Subject: place of use

Mr. Meserth,

I investigated the place-of-use problem with your water right # 65-10784. I found that the recommendation layer on our web page does have the shape you are concerned about. (That's the lazy B shape.) And that is as it should be because that shape was the recommended shape.

However, I also found that the water right layer has the corrected shape. (That's the rectangle with a nose). Your claim has been decreed by the court. It is a water right and no longer a claim. In your case, a different place-of-use will appear in the water right layer than appears on the recommendation layer. That is also as it should be. The recommended shape is not the same as the decreed shape. So from where I sit inside our firewall, the place-of-use for your claim and your water right appears to be correct.

I am concerned that we may be disseminating incorrect information and I need to address that problem. I don't know the steps you made in your query. Please repeat your query one more time and document for me, the steps that took you to the incorrect place-of-use you are seeing. I will make arrangements to step outside our firewall and follow right behind you. Your query may be the template for correcting a different problem.

Don't hesitate to call or email me with your questions.

Thank you
Michele Edl
