

MEMORANDUM

DATE: August 21, 2007

FROM: Ernie Carlsen

TO: 15-7288, Lynn Wright

RE: Status of water use under 15-2021 and 15-4185

Contacted Lynn Wright by telephone to discuss the historical use of water under 15-4185 and 15-2021. According to Lynn the flowing wells identified under these two rights still exist and when flowing the water is used for irrigation of up to the 24 acres covered under 15-2021.

However, there are a number of irrigation wells in the area that have the cumulative effect of drawing down the water table and as a result during the irrigation season Lynn's wells eventually cease flowing.

Lynn wants to drill a new well he can equip with a pump so he is not reliant on the old flowing wells. If he is allowed to drill a new well he will cap the old wells. Lynn is definitely interested in filing a transfer application to retain the older priority dates. He will investigate obtaining evidence to support the 1930 priority date listed on 15-4185. He will call back next week.
