

MEMORANDUM

To: Water Right File No. 96-9183
From: Aaron Marshall
Date: August 27, 2007

Re: Water Right No. 96-9183, License Processing

Upon evaluation of permit 96-9183 for license issuance, I made the following observations:

Two statutory claims 96-4043 and 96-4114, with use of irrigation, share the same legal description as this permit, T. 55N, R. 2W, Sec. 7, Lot 7 (NW $\frac{1}{4}$ NE $\frac{1}{4}$). Each claim is for the irrigation of one acre or less. There is no apparent place of use overlap between the claims and this permit.

The field examiner recommended the reduction in place of use acreage from 1.0 to 0.64 acres and the ArcView shape was modified accordingly. Since acres are identified on a license to tenths, I rounded the total acreage to the nearest tenth, 0.6 acres. This required the annual volume limit to be recalculated based on the field headgate requirement of 3.0 acre-feet per annum. The resulting volume is 1.8 acre-feet per annum.

The field examiner indicated that the conditions of permit approval have been met. There is no evidence provided indicating that permit conditions no. 4 (fish screen) and 5 (approach velocity) have been satisfied.

Field examination flow and volume calculations have been checked and are correct.

The license for 96-9183 was issued based on the field examiner's recommendation.
