3. jstanton 2/7/2007 Comment/Analysis

Comment: This application proposes to expand the existing ppu owned by the applicants by tying in additional land and wells that they also own in order to provide maximum flexibility in system operation. The place of use is also being changed slightly to show what land is presently farmed or still farmable. This appears to be a pretty standard transfer that should be approvable with standard conditions.

Authority To File: The applicants are the owners of record for all of these rights, so this not an issue.

Water Right Validity: These rights were decreed in 2005, so forfeiture is not an issue.

Injury To Other Rights: There should be none.

Enlargement of Use: None requested.

Local Public Interest: No issues identified.

Beneficial Use/Conservation of Water Resources: No issues identified.

Review of the application finds that there is no clear inconsistency with criteria set forth in Sec. 42-222 I. C. preventing processing. At least prior to advertising, no other issues have been identified that would require further review or submittal of additional data by the applicant.

4. jstanton 2/7/2007 Legal Notice Remarks

Comment: This application proposes to add about 550 existing acres and 4 existing wells to an existing irrigation system consisting of about 1360 acres and 5 wells in

wells to an existing irrigation system consisting of about 1360 acres and 5 wells in order maximize system efficiency. No new land will be irrigated, and no new wells will be drilled. The property is located from 2 miles south to 5 1/2 miles south of Declo, Idaho.
