For the Director

Memorandum and Water Use Agreement

Whereas drought conditions have continued in Idaho, and the need to provide for temporary changes in water right administration is recognized by Idaho Code 42-222A ; and

Whereas it is mutually agreed that no one is materially damaged and benefits may accrue to both parties; the parties, Progressive Irrigation District (Progressive) and Harrison Canal and Irrigation Co. (Harrison) agree to the following;

Beginning August 16, 2007 12:01 A.M. Harrison will transfer 66.33 c.f.s of natural flow decreed water with priority dates of 6-01-1888 and earlier, to be used by Progressive for the following periods; August 16, 2007 through August 31.

The parties believe that the priority dates of these water rights involved will be deliverable for the periods of time and the amounts contemplated in this agreement.

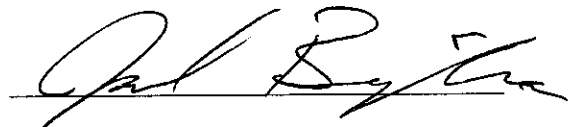

The diversion points for Progressive will be any of their recorded points of diversion and the diversion point for Harrison is the Harrison head works on the Great Feeder Canal.

The purpose of this transfer is to provide a means for Progressive to consolidate natural flow, and to provide a means to actually irrigate growing crops rather than divert decreed water in such an amount that it would not provide adequate water to the patrons of Progressive Irrigation District.

This agreement is adopted and approved this day, August 14, 2007 ; signing for the parties

Dale Rockwood, Chairman
Progressive Irrigation District

Joel Brighton, President
Harrison Canal and Irrigation Co. Inc.
