RE: Milner Project No. 2899 – Article 417 – Communication Network

Dear Mr. Dreher:

In accordance with requirements of the Milner license Article 417 Plan for a Communication Network, your agency or entity is being advised that Idaho Power and Milner Dam Inc., while coordinating with the U.S. Bureau of Reclamation and major irrigators, are projecting that flows of 10,000 cfs or greater in the Class V whitewater Milner Gorge Reach below Milner Dam on the Snake River are very unlikely to be available during May or June 2007.

Flow predictions are based on a number of factors including, but not limited to snow pack, weather conditions, irrigation needs, flood control, and anadromous fish flow releases. To get the latest available flow predictions, please call 1-800-422-3143.

Sincerely,

Dwayne L. Wood
Supervisor Recreation Programs
