

MEMORANDUM

Date: September 06, 2007
To: Transfer 73640
From: dcarlson
Re: transfer evaluation

This transfer proposes to move the point of diversion to an existing well that is no longer in use (was used for 13-7005). Change the place of use to the current system

Authority to File:

Applicant provided quit claim deeds for the property. The deeds show two different names that the Jorgensens use. They wanted this right in the LLC name.

Water Right Validity:

This water right was decreed in the 1992. There were temporary transfers filed on in 2004 and 2005 to use this same well. Air photos from 2006 show it to be irrigated. Forfeiture is not an issue.

Injury to Other Water Rights:

In Water District 13T, Watermaster made comments

The well in question did not have to be abandoned in the manner the watermaster is suggesting based on transfer 4842. It just needed to be capped, so the reuse of this well would be acceptable. It was and is also being used as a monitoring well.

Transfer will be advertised to determine any protests.

Enlargement of Use:

There is no evidence of enlargement of use.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issue identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
