Re: Applications for Croy Creek Ranch Limited Partnership
Project No. 553-01-2002

Dear Jim:

As I've discussed with you on the telephone, the development plans for Croy Creek Ranch have been finalized, and involve some changes to the original proposal for water distribution.

The general approach of restructuring the rights in a PPU will remain the same, with the PPU boundary unchanged. However, the east pump station is being deleted, as is the contemplated injection of groundwater into Croy Creek. Both groundwater and Croy Creek water will be diverted to a booster pump station and thence into the irrigation system. The Bullion Creek water will be pumped to the same system directly from the storage pond. Also, the point of diversion for 37-255 is being moved slightly northward to better fit with the development.

Enclosed is a revised map reflecting these changes, and a revised Part 1 for each transfer application. These documents should supplant those you already have.

Thank you, and please let me know if you need anything further in order to process the applications.

Cordially,

Charles G. Brockway, P.E.
