### PROOF ACKNOWLEDGMENT LETTER

**RE: PERMIT NO. 72-16702**

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use(s) of the water.

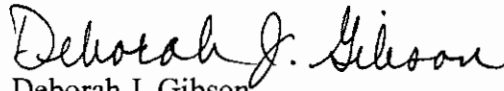

During my review of your proof and permit, I found that according to condition of approval paragraph no. 4 of this permit that states, "Prior to diversion of water under this right, the right holder shall install a lockable device, subject to the approval of the Department, in a manner that will provide the watermaster suitable control of the diversion." Also be aware of condition no. 5, which states, "As part of the diversion works, the right holder shall install a straight length of conduit that will accommodate a device for measuring the entire flow of water being diverted in connection with this right. The straight length of conduit shall be at least ten times the diameter of the conduit and shall be above ground or otherwise easily accessible." I recommend that these conditions of the permit be completed. If you have complied with these conditions please ignore this information. However, if you disagree with these requirements, you may file a written request for waiver of these conditions to the department. The department will issue a decision upon consideration of your Watermaster's review and written response.

Be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.
