Subject: Capitol Mall Geothermal - Questions

Shelley and Ken:

Here is a summary of the questions that I posed to Shelley earlier today regarding the Capitol Mall geothermal water rights:

1) What method was used to calculate the quantity figures depicted in the data that was sent our way earlier this week?

2) Why do the figures appear to conflict with those found in the report produced by the Idaho Water Resources Research Institute entitled, Hydrogeologic Conditions in the Boise Front Geothermal Aquifer (2003) (available at <http://www.boise.uidaho.edu/default.aspx?pid=33453>)

3) The total production figures for years 1983-1986 contained in the 1990 Berkeley Group Inc Report (available at <http://www.osti.gov/energycitations/servlets/purl/6460627-jHeimp/native/>) were obtained from the following two reports. Do you have copies of these reports?

a) C.J. Waag, & S.H. Wood, Idaho Water Resources Research Institute, Base Line Data Analysis of a Developing Geothermal System, Boise, Idaho, Report No. 198511 (1985); and

b) R . Keith Higginson, Higginson-Basnett Consultants, Investigation of the Boise Idaho Geothermal System, Report to Boise State University (1987).

Thank you for your time.

Sincerely,

David I. Stanish
