RE: APPLICATION FOR PERMIT

Dear Applicant:

You recently filed the above referenced application for permit that includes a consumptive use. Your proposed development might impact the water supply related to fishery resources sometime in the future.

Applications that include consumptive use can be processed if applicants are willing to accept a condition of approval that can require mitigation at a later date if the need for mitigation is clearly documented. Mitigation can include steps such as purchasing storage water to offset adverse impacts to fishery resources.

Enclosed is a response form to be completed and returned if you are willing to accept this condition of approval. Please note that mitigation is not required at this time but might be in the future.

Also enclosed is a withdrawal form to be completed and returned if you are not willing to accept the mitigation condition at this time. You will receive a refund for the filing fee if you withdraw the application.

According to your application, the proposed well has already been constructed under drilling permit No. 65-91-W-0131-000 and our records show a \$35 fee paid. The well was constructed as an exempted-use domestic well, and its use is presently limited to diversions for a single-family home and no more than 1/2 acre irrigation. Because the well is now proposed for purposes in excess of domestic use, the drilling permit must be upgraded to non-domestic use.

A \$200 drilling fee is required for non-domestic wells. The fee you have already paid has been applied to this amount. You must submit the \$165 balance to upgrade the drilling permit if you choose to proceed with your application.

Please let me know if you have any questions about your application.

Sincerely,

A handwritten signature in cursive script, appearing to read "Lori Graves".
