

Aug. 13, 2007

Water Resources Department,

I appreciate your help. I'm sorry this took me as long as it did to get this back to you. We are trying to get our crop in before it gets burned or hauled on and we have been extremely busy.

I have a favor to ask. We are doing this spring project in conjunction with a NRCS SWCA grant and have to have all the work ^{finished} and hills in before Sept 1, 2007. We have at least a week's worth of work to do. ^{on the spring} If there is any way this could get approved and sent back in a couple of days I would really appreciate it.

We have received our permit from the Army Corp of Engineers - so as far as I know, hearing from your department is the last hurdle we have to clear to get this project completed.

Thank you very much.
