Arco Idaho 83213

Dear Doug;

In reviewing ground water diversions it appears that your well on the Eastside Canal is pumping more water than it is licensed for. The only rights we can find for this well is right 34-7100 for a maximum diversion of 2.72 cfs. Our records indicate you are pumping 6 cfs.

If you have any water rights pertinent to this well that are not listed above please produce them within 10 (ten) days or reduce the Volume being diverted to comply with your above listed rights

Sincerely,
Bob Shaffer
