

CONVERSATION MEMORANDUM

To: John Westra / File
From: Denise Buffington
Date: March 7, 2007
Subj: Status of Transfer App for Boise Highlands Development

I contacted Roxanne at SPF Water Engineering regarding the above referenced application for transfer. We received it on February 8, but it was not signed. To my knowledge, our office had made contact with SPF and attempted to obtain a signature several weeks ago. She informed me today that they were no longer working for the applicant, due to the fact they were in "disagreement" over filing the transfer. Roxanne stated that the applicant insisted on filing the transfer, against SPF's recommendation. She tried to explain that the Department has a large back log of new applications and that these types of filings take time to process. The applicant did not seem to understand why it could not be processed immediately.

Roxanne indicated we need to contact the applicant directly, in order to discuss this application and anything else that is needed to begin processing. The contact person is Alice Culver.

-- Daryl Rhead called this afternoon also, inquiring about this application. I told him that we were waiting on a signature. He said he would contact Alice Culver and let her know

-- Alice Culver called at 4:00 today, asking why it had taken so long for the Department to contact them regarding the application needing a signature. I explained to her that we contacted SPF a few weeks ago, and received no response. She seemed upset that the signature is holding up the processing of the application. She said she would be in to our office at 9:00 on March 8th, to take care of it.
