

## MEMORANDUM

**Date:** August 09, 2005  
**To:** Water Right File 47-17239  
**From:** jstanton  
**Re:** Field Report Narrative

---

This right is based on the diversion rate and irrigated acreage found during the licensing exam for 47-8185. The system has been completely changed from gravity irrigation of pasture to sprinkler irrigation of lawn and other ground cover. Three parts of the permit have been assigned to other owners based on their actual present irrigation. The original exam found 6.4 acres irrigated; 1.9 acres have been assigned, leaving 4.5 acres that can be licensed to Eggleston. About 1 acre on the Eggleston parcel is presently irrigated, but he wants to retain the right to irrigate additional land (which is allowable under present licensing policy). So the shape file for this right is just an approximation that covers the 4.5 acres allowed.

Of the 0.15 cfs recommended for the original system, 0.05 cfs has been assigned; the remainder of 0.10 cfs is recommended for this portion. This is operated as a single system by Mr. Eggleston, so the rate splits are really just for bookkeeping purposes. The 4 rights just add up to the recommended rates and acres, so no overlap conditions are needed.
