Re: Field Report Narrative

This right is based on a proportional split of the acreage and diversion rate found in the licensing exam for 47-8185. The system is completely changed now, going from gravity irrigation of pasture to sprinkler irrigation of lawns and other ground cover. Four owners share the well, which is operated by Mr Eggleston. This part of the right irrigates 3 separate patches of land on the Brodine property, but does NOT irrigate the lawn. A separate well irrigates the lawn under an app for permit that was just filed. The Brodine property is the southernmost of the 4 parcels, and all the irrigated land under this right is north or west of the Brodine home
