RE: Application For Amendment of Permit 57-11612

In May, 2002, the permit holder filed a permit amendment to drill and use a separate domestic well instead of the shared well. At the time of my exam in August, 2005, the permit holder was still using the shared well and the domestic well had not been drilled. Based on the field exam findings, the application for amendment of permit 57-11612 can be withdrawn.
