Re: Ownership change documents

It appears the POU and POD on the water right were originally claimed in the wrong location. A letter was sent to the applicant explaining that the ownership change cannot be processed unless the POU authorized under the water right matches the property owned by the applicant. In a telephone conversation with the applicant, I also explained the process of approaching the SRBA court to file a motion to set aside to correct the decreed POU. Since a change to the decree will take some time, the file has been placed on six-month call-up. If the owner has not responded in that period, the Ownership Change form should be returned.
