

7/11/2007

22-13595

Last week I spoke with engineer Steve Wanicott^(sp?) about his response to Erin Petelle's 6/19/2007 letter. Steve said that he'll send information detailing how the rate was determined and how the water is disposed of so that the use is non-consumptive.

If the use consumes water, we may not be able to approve the application without mitigation. Perhaps public interest considerations will trump the moratorium.
