

MEMORANDUM

Date: July 26, 2007
To: Water Right File 75-14329
From: cpadilla
Re: Permit Review

Watermaster opposes approval based on whether the land is irrigable. This will not affect the approval since the concern is with the overappropriation of Williams Creek, not whether the applicant has 7 acres to irrigate. The issue of land being irrigable has been addressed by Sharla Cox in previous memo. The season of use as filled out on application is incorrect and was updated to the standard for this area.

Proof of beneficial use date reduced to one year instead of the five years requested on application since the permit is being approved based on the system already being existing and developed. Application is recommended for approval as suggested by the region.
