Method of Determination:

3. ☐ Delivery System Diagram Attached (required). Indicate all major components and distances between components. Indicate weir size/pipe as applicable.
- ☒ Map Attached Showing Location(s) of point(s) of diversion and place(s) of use (required). Scale must be 1:24,000 or greater.
- ☐ Aerial Photo Attached (required for irrigation of 10+ acres).
- ☒ Photo of Diversion and System Attached

4.

<u>Well or Diversion ID No.*</u>	<u>Motor Make</u>	<u>Hp</u>	<u>Motor Serial No.</u>	<u>Pump Make</u>	<u>Pump Serial No. or Discharge Size</u>
A0017716	Subm.	5			

*Code to correspond with No. on map and aerial photo

D. FLOW MEASUREMENTS

1.

<u>Measurement Equipment</u>	<u>Type</u>	<u>Make</u>	<u>Model No.</u>	<u>Serial No.</u>	<u>Size</u>	<u>Calib. Date</u>
Portaflow	Sonic	Fuji		240332		4/2007

2. Measurements:

Was unable to take flow measurement because of insufficient space to place meter on pipe. A measurement was taken on the new well (A0017715), which was equipped with a pump of similar make and horsepower. The highest positive flow indicated 27 gpm. An average flow was unable to be determined due to negative flow readings from water being drawn from pressure tanks. From this measurement, the estimated discharge from the old well is 27 gpm.

E. FLOW CALCULATIONS☐ Additional Computation Sheets Attached

Measured Method:

Polysonic Flowmeter: 27 gpm on New Well (A0017715)

$$\text{HP Equation: } \frac{5 \times 8.8 \times 0.7}{100 + (50 \times 2.31)} = 0.14 \text{ cfs}$$

Theoretical yield is higher than measured, It's assumed that the pump was not operating at capacity.

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 =$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} =$$

2. Volume Calculations for Other Uses:

$$\text{System Capacity Volume} = 0.14 \times 1.9835 \times 365 = 101.3 \text{ AF}$$

Calculations for Stock Consumption based on additional cattle after the 1917 Decree:

$$\text{Milking Cows: } 226 \text{ cows} \times 35 \text{ gpd} \times 365 \text{ days} = 8.9 \text{ AF}$$

$$\text{Dry Cows: } 75 \text{ cows} \times 12 \text{ gpd} \times 365 \text{ days} = 1.0 \text{ AF}$$

Total Stock Flow of 0.05 cfs based on livestock table.

Total Stock Volume: 9.90 AF

Total Commercial Flow calculated from *Attached Dairy Spreadsheet* = 0.02 cfs

Total Commercial Volume: 6.80 AF

G. NARRATIVE/REMARKS/COMMENTS

The permit lapsed in February 1, 1991 due to proof not filed. Permit holder had also requested for an extension of time late in 1990 but was denied for lack of development of the dairy. The reason stated from the owner was lack of funds. The owner was also ill and passed away that year.

The trust applied to reinstate the application in 1997. The legal description was always wrong on the permit, showing that the dairy would be developed in the NESW. The old dairy and residence was in the NWSW (36-10482) and the Reitsma's new residence (36-10483) constructed in NESW. Consequently, a drill log dating back to 1979 for the new residence was erroneously sent in with the application to reinstate, because the legal matched the permit. Milk receipts and other information from the original dairy were also submitted, evidencing use in excess of beneficial use claim 36-10482, so the request for the extension of time was approved and the priority date advanced to July 23, 1997.

During our field exam we discovered that the New well had not been drilled until 1993 and the new barn and corrals also developed that same year. Since the permit lapsed in 1991, the new development cannot be included on the license. There is a pending transfer to bring additional water into the dairy. IDWR or WD130 could treat the operation since 1993 as a violation, but as the series of events and discrepancies appear to be unintentional, this will not be pursued. Our recommendation is therefore limited to that development which occurred prior to 1991, and in excess of the 1917 beneficial use decree for the original dairy, which consisted of one well, the old barn and the North corrals. Since the decree for 36-10482 indicates a 200-cow dairy, volumes and flow components for this recommendation are based on the 426-cow herd present in 1991, less the 200 cows on the decree, or 226 milking animals and a proportional number of dry animals.

Once licensed, this right will be included in the pending transfer. Right no. 36-10482 at the original dairy was decreed with an incorrect pod description; this will also be corrected via the transfer.
