Reference: Action 72881 "New Proposed Ammon Well - 21st South in the Villas"

Dear Department of Water Resources:

I wish to formally submit this letter concerning my existing water rights (well), and the potential adverse impact on said well, by the proposed Ammon City well to be established in the Villas subdivision on E. 21st South. My well is within 1,000 feet of the proposed well (Action 72881). As my well was drilled to 140 ft and City wells are drilled much deeper, I am concerned that the proposed Ammon well could adversely impact the water table I'm currently using. As of this writing I have never experienced any problems associated with lack of water due to low levels.

I fully appreciate the City of Ammon's need for new wells to support the rapid growth being experienced in the area. I am not against their obtaining permits for such wells, but I expect my current water rights (including my well) to be preserved and protected.

Sincerely,

Richard D. Fowler
