July 16, 2007

Idaho Department of Water Resources
900 North Skyline Drive
Idaho Falls, ID 83402

To whom it may concern,

This letter is in support of the gravity pressure pipe line on Medicine Lodge Creek. I do not see how this project, the way it is proposed, can be an injury to any water users on Medicine Lodge Creek or its tributaries.

The proposed project also meets the resolutions adopted by the water users for diverting water. These resolutions are voted on during the annual meeting of Water District 32-C.

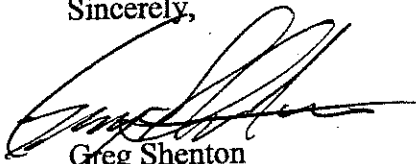

I do support the additional point of diversion and the construction of the gravity pressure pipe line if the following conditions are met:

- 1- Maximum flow rate: at no time will there be no more than ten cfs diverted at this POD.
- 2- No return flow to the creek: at no time will there be flow returning to the creek after it goes over the weir.

3- Head gate and weir: there will be a controllable head gate and weir installed before the water enters the pipeline.

4- Holmes water not moved down stream: At no time will Holmes water be diverted the Shenton PODs. These are water rights 32-1a through 32-5a.

Sincerely,

Greg Shenton
Watermaster

WATER DISTRICT # 32-C

DUBOIS, IDAHO 83423

We the undersigned having and owning water rights on Medicine Lodge Creek and its tributaries, support the Gravity pressure group pipeline Project for Egan and Shenton. We see this as a benefit to the system and will not protest this added point of diversion as proposed, as there is no injury to the water users.

PROTEST the vesting of water -
when water isn't being used it should stay in
Creek - no waste of water for any purpose
including extra trouble for the water masters
