PROOF ACKNOWLEDGMENT LETTER

Re: Permit No. 63-31659, 63-31660, 63-31785, and 63-31786

Dear Permit holder:

The department acknowledges receipt of the proofs of beneficial use ("proof") forms submitted for the above-referenced permits. The proofs for permits 63-31659 and 63-31660 were timely, however the proofs for permits 63-31785 and 63-31786 were 2 days late. Therefore, enclosed are two orders that reinstate permits 63-31785 and 63-31786, since proof and the license examination fee were submitted after the proofs' deadline. Please note that the priority date for these permits have been advanced to October 9, 2003, as provided in Section 42-218a(2), Idaho Code.

According to your letter transmitting the referenced proof forms, I understand that you have some concerns that the legal descriptions for the permits do not match the legal descriptions on the well driller's reports. The permit identifies the authorized location of the point of diversion by legal description.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use of the water, and that it meets the permitted beneficial use. The resulting field report will verify the location of the wells. If there is a discrepancy of the permitted point of diversion, a licensing amendment may be necessary to correct the legal description prior to the issuance of the license. The final license will accurately reflect the water right's system as developed.

Be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office, or at the department's website at: www.idwr.idaho.gov
