

State of Idaho
Department of Water Resources

RECOMMENDATION OF WATERMASTER

Application No: 72751
Water Right No: 36-2079, 2157
Applicant Name: ~~Star Falls Ag~~ Richard Trail Trust (cyp)

Watermaster's Recommendation:

- a) ☐ I do not oppose approval of this application
- b) ☒ I do not oppose approval of this application if it is conditioned as follows:

Add 131, meas device w/ irrigation waiver

Eliminate additional 15 acres of PPU *

- c) ☐ I oppose approval of this application(s) for the following reasons:
- d) ☒ Additional comment:

* 83.4 acres in pivot corners under right 36-2157 are enrolled in CREP – this could prevent the approval of this application entirely, except that the water right relocation is necessary to reconcile the water rights with a prior land swap between adjacent properties. Water right acreage in corners cannot be modified because of the CREP Agreement and contract. therefore the additional ppu acres cannot be added in corners. I am comfortable only with adding the 4 reclaimed acres under the pivots where absolutely necessary to replace acres that were pulled under the CREP contract. This is necessary only in Section 14, NWSE where the Star Falls rights were removed, and in Section 14 SESE where there is an acreage shortfall. All other acres must remain as on the original rights and ppu must not exceed 530 acres.

Dated: July 5, 2007

Water District 130

Cindy J Yenter
Cindy J Yenter, Watermaster

→ * Star Falls acres were not included in the CREP offer but the SESE S14 was.
