1. Proof of application of water to beneficial use shall be submitted on or before July 1, 2008.
2. Subject to all prior water rights.
3. Place of use includes a portion of Homestead Entry Survey No. 707.
4. Water shall not be diverted for fire protection use under this right except to fight or repel an existing fire.
5. The Director retains jurisdiction of this right in order to limit the use of water for hydropower generation purposes to a specific term of years as required by Section 42-203B(7), Idaho Code.
6. The water right acquired under this permit for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

State of Idaho
Department of Water Resources
Permit to Appropriate Water
NO. 77-07161

CONDITIONS OF APPROVAL

7. This right does not constitute Idaho Public Utilities Commission or Federal Energy Regulatory Commission approval that may be required.
8. Prior to the diversion and use of water under this approval, the right holder shall comply with all fish screening and/or fish passage requirements of the Idaho Department of Fish and Game.
9. This right is subject to the provisions of Sections 42-205 through 42-210, Idaho Code, restricting the sale, transfer, assignment, or mortgage of this right. Failure to comply with these provisions is cause for immediate cancellation of this right.
10. Prior to diversion of water under this right, the right holder shall install a lockable device, subject to the approval of the Department, in a manner that will provide suitable control of the diversion.
11. As part of the diversion works, the right holder shall install a straight length of conduit that will accommodate a device for measuring the entire flow of water being diverted in connection with this right. The straight length of conduit shall be at least ten times the diameter of the conduit and shall be above ground or otherwise easily accessible.
12. Upon specific notification of the Department the right holder shall install and maintain acceptable measuring device(s) to determine the instantaneous rate of flow of water through the system, including data logger(s), at the authorized point(s) of diversion, in accordance with Department specifications.
13. When notified by the Department or by a watermaster with regulatory authority over this right, the right holder shall report the amount of water diverted in connection with this right. The report shall be submitted in the manner and frequency specified by the Department or the watermaster.
14. If a measuring device is not immediately installed, the right holder shall provide to the department a flow rate measurement or computation made by a certified water right examiner in accordance with actual system design and operation.
15. This right does not grant any right-of-way or easement across the land of another.
16. Any stream channel alteration for the discharge of return flows into Lemhi Creek or the Salmon River shall be authorized by a separate stream channel alteration permit.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this 3rd day of July, 2007.

for DAVID R. TUTHILL, JR., Director
