State of Idaho
Department of Water Resources
Permit to Appropriate Water

NO. 63-31660

Priority: March 07, 2003

Maximum Diversion Rate: 0.33 CFS

This is to certify, that CHURCH OF JESUS CHRIST OF THE LATTER DAY SAINTS
REAL ESTATE DIVISION
TWELFTH FLOOR EAST
50 E NORTH TEMPLE ST
SALT LAKE CITY UT 84150-6312

has applied for a permit to appropriate water from:

Source: GROUND WATER

and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
FIRE PROTECTION	01/01 to 12/31	0.33 CFS
DOMESTIC	01/01 to 12/31	0.04 CFS

LOCATION OF POINT(S) OF DIVERSION:

GROUND WATER NE $\frac{1}{4}$ NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 33, Twp 04N, Rge 02W, B.M., CANYON County

PLACE OF USE: FIRE PROTECTION

Twp Rge Sec	NE				NW				SW				SE				
	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	Totals
04N 02W 33													X				

PLACE OF USE: DOMESTIC

	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	Totals
04N 02W 33													X				

CONDITIONS OF APPROVAL

1. Proof of application of water to beneficial use shall be submitted on or before **June 01, 2004**.
2. Subject to all prior water rights.
3. Water shall not be diverted for fire protection use under this right except to fight or repel an existing fire, except that the right holder may drain the storage tank for maintenance purposes and may refill it within a 24-hour period once each year. Water released from the storage tank for maintenance purposes shall not be used for non-authorized uses.
4. Domestic use is for 1 church and does not include lawn, garden, landscape, or other types of irrigation.
5. The daily diversion volume for the domestic use authorized under this right shall not exceed 2,500 gallons per day.
6. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
7. Water bearing zone to be appropriated is from 50 to 150 feet.

MICROFILMED

MAY 9 2 2004

State of Idaho
Department of Water Resources
Permit to Appropriate Water
NO. 63-31660

8. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this 30th day of May, 2003

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of Applicant Church of Jesus Christ of Latter-Day Sts. Phone 801-240-4656
Mailing address Real Estate Division, 12th Flr. East, 50 E. North Temple, SLC, UT 84150
2. Source of water supply Groundwater which is a tributary of N/A
3. Location of point of diversion is Township 4 North Range 2 West Sec. 33, in the NE $\frac{1}{4}$,
NE $\frac{1}{4}$, SE $\frac{1}{4}$, Govt. Lot N/A, B.M., Canyon County;
additional points of diversion if any: None
4. Water will be used for the following purposes:
Amount 0.33 cfs for Fire Protection purposes from 01/01 to 12/31 (both dates inclusive)
(cfs or acre-feet per annum)
Amount 0.04 cfs for Domestic purposes from 01/01 to 12/31 (both dates inclusive)
(cfs or acre-feet per annum)
Amount --- for --- purposes from --- to --- (both dates inclusive)
(cfs or acre-feet per annum)
Amount --- for --- purposes from --- to --- (both dates inclusive)
(cfs or acre-feet per annum)
Amount --- for --- purposes from --- to --- (both dates inclusive)
(cfs or acre-feet per annum)
Amount --- for --- purposes from --- to --- (both dates inclusive)
(cfs or acre-feet per annum)
5. Total quantity to be appropriated is (a) 0.33 cfs and/or (b) N/A
cubic feet per second acre feet per annum
6. Proposed diverting works:
 - a. Describe type and size of devices used to divert water from the source Water will be pumped from a proposed on-site well for storage in a proposed 180,000-gallon on-site tank.
 - b. Height of storage dam N/A feet; active reservoir capacity N/A acre-feet; total reservoir capacity N/A acre-feet
 - c. Proposed well diameter is 6-8± inches; proposed depth of well is 150-200± feet
 - d. Is ground water with a temperature of greater than 85°F being sought? No
 - e. If well is already drilled, when? N/A; Drilling firm N/A;
Well was drilled for (well owner) N/A; Drilling Permit No. N/A
7. Time required for completion of works and application of water to proposed beneficial use is 1 years (minimum 1 year)
8. Description of proposed uses (if irrigation only, go to item 9):
 - a. Hydropower; show total feet of head and proposed capacity in kW. N/A
 - b. Stockwatering; list number and kind of livestock. N/A
 - c. Municipal; show name of municipality. N/A
 - d. Domestic; show number of households. Internal church supply
 - e. Other; describe fully. Fire protection, including hydrants and sprinkler supply.

MICROFILMED

11/18/2003

3. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: *D* for *Domestic*) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
4N	2W	33													F				
															D				

Total number of acres to be irrigated N/A

10. Describe any other water rights used for the same purposes as described above. Any additional water needs may be supplied by existing surface water rights for the 4-acre property.

- Who owns the property at the point of diversion? LDS Church
- Who owns the land to be irrigated or place of use? LDS Church
- If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: N/A

12. Remarks: Requested appropriation includes: (1) up to 2,500 gallons per day for the internal domestic supply needs of the church, and (2) up to 1,750 gallons per minute for fire suppression needs (e.g., hydrant and sprinklers) as required by the Nampa Fire Department. The well water will replenish the 180,000-gallon supply in the on-site tank that will provide the 1,750-gpm water-supply need for fire suppression. Domestic supply will be plumbed separately.

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½"x11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. (A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.)

BE IT KNOWN that the undersigned hereby makes this application for permit to appropriate the public waters of the State of Idaho as herein set forth.

REQUEST TO PROCESS

COMPLETE REQUEST IF YOU WANT YOUR APPLICATION TO BE PROCESSED USING ONE OF THE
THREE ALTERNATIVES BELOW

Name of Applicant Church of Jesus Christ of Latter-Day Saints
Mailing Address Real Estate Division, 12th Flr. East, 50 E. North Temple
Salt Lake City, Utah 84150
Application No. _____
(if known)

 IN LOCAL PUBLIC INTEREST

Yes, I want my application processed and before it is advertised, I will amend my application to demonstrate that the proposed appropriation is in the local public interest including the need to preserve flows in the Snake River during the migration periods of anadromous fish.

 PROPOSE MITIGATION NOW

Yes, I want my application processed and before it is advertised, I will amend my application to include proposed mitigation to offset anticipated depletions in the Snake River during periods of anadromous fish migration.

 X WILL AGREE TO MITIGATION IN THE FUTURE IF NECESSARY

Yes, I want my application processed at this time, and I will accept a condition of approval that will require mitigation should the Director of the Idaho Department of Water Resources determine that mitigation is necessary to offset depletions from this appropriation to flows in the Snake River during periods of anadromous fish migration. I understand that mitigation is not required now but may be needed in the future. I also understand that the Director will not require mitigation until I have an opportunity to review the process by which the need for mitigation is established and the amount of water required is quantified.

RE: Permit No. 63-31660

Permit Approval Notice

Dear Permit Holder:

The Department of Water Resources has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a PRELIMINARY ORDER issued by the Department pursuant to Section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Enclosed is a form entitled 'Instructions for Proof of Beneficial Use.' Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled 'Proof of Beneficial Use.' If your project is already completed, you should complete and submit this form immediately.

The right to drill a well is not a part of this permit to appropriate water. Beginning in July of 1987, a statute was enacted which requires a drilling permit for new well construction and deepening of existing wells. If the well(s) proposed for use under this water right permit were drilled or deepened after July 1, 1987, a separate drilling permit must be obtained from this Department. Please contact the Ground Water Protection Section located here at this office or our regional office nearest you.

MICROFILMED

JUN 11 2003

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

A handwritten signature in black ink, appearing to read "Shelley W. Keen". The signature is fluid and cursive, with the first name "Shelley" being more prominent.

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

(To be used in connection with actions when a hearing was not held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below.

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of, or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Comment Report

63-31660

1. Igraves 3/26/2003 Legal Notice Remarks

Comment: Water bearing zone to be appropriated is from 50 to 150 feet.

2. Igraves 3/26/2003 Comment/Analysis

Comment: Applicant is limited to 2500 gpd. Surface water is the primary irrigation source. No other rights are used.

3. kwalker 5/28/2003 Title of Signee

Comment: This morning I called Salt Lake City to find out what Mr. Koudelkas title is. I talked with Roy McDaniel who stated Mr. Koudelka is a project manager for the church.

4. kwalker 5/29/2003 Non-consumptive use

Comment: When the storage tank under this permit is drained the water may be dumped into the canal on site. Since this water will be discharged into the canal and may be used by other people downstream this annual drainage would be considered non-consumptive.

MEMORANDUM

TO: Files 63-31659 and 63-31660

FROM: KAY WALKER 

RE: Annual Drainage of Storage Tanks

Date: May 29, 2003

.....

I talked with Larry Nodler this morning regarding these applications. I asked him what they planned to do with the water from the storage tanks when they empty them. Mr. Nodler stated they would probably discharge the water into the canals on site. Mr. Nodler said if they do drain the tanks annually they would drain them during the non-irrigation season so they wouldn't have negative impact on the canals, and during the year when fires were not a large concern.

RE: Drainage and refilling of storage tanks under applications

Date: May 28, 2003

.....

I talked with Larry Nodler of American Geotechnics this morning to find out about the annual drainage and refill of the storage tanks under these applications. Mr. Nodler thought that he heard the fire department required the drainage and refill of the tanks on an annual basis, however, he also said it was a basic good practice.

I then contacted the Star Fire Department to find out if the drainage and refilling of the storage tank was required by them. The Fire Marshall said it was not one of their requirements; he suggested that they might want to do this to refresh their domestic water supply that would also be in the same storage tank. The fire Marshall said that all they want is for water to be available in case of a fire; he would also advise the right holders that they need to advise the fire department prior to the annual draining of the tank.

RE: Water Right No. 63-31659 in the Name of the Church of Jesus Christ of Latter-Day
Saints

Dear Ms. Taylor:

Thank you for the opportunity to respond to your email dated April 17, 2003. We have the following general comments regarding this project:

New Public Drinking Water System

We recommend that you contact our office directly for each new water system. There are several typical categories described below:

- a. This project will serve more than 24 people for more than 60 days per year and will be a Public Drinking Water System (PDWS) and/or Supply. Per *Idaho Code* § 39-118 and the associated *Idaho Rules for Public Drinking Water Systems*, all components of PDWS construction, including wells, must be designed by an Idaho registered professional engineer (engineer) and approved by the Idaho Department of Environmental Quality (IDEQ) prior to construction.
- b. All public water system facilities must have an engineering report and plans and specifications prepared by a registered professional engineer and submitted to DEQ for review and approval prior to construction. The engineering evaluation must cover physical factors such as source selection and construction, structures, pipelines, reservoirs, and related appurtenances. The evaluation must also cover non-structural factors such as system ownership, the ability of the initial owner to finance construction, and the ability of the final owner to finance, operate, and maintain the completed system.

MICROFILMED

MAY 14 2003

Sue Taylor
Idaho Department of Water Resources
May 7, 2003
Page 2

- c. Both the well site and plans and specifications must be approved prior to drilling. Well houses must also have construction plans and specifications approved prior to construction. We will also need to see the Permit to Appropriate Water, or an equivalent document, from the Idaho Department of Water Resources. If there are well known concerns about groundwater in that particular area, the client will be advised at that time.
- d. Individual service lines should be reviewed by the State Plumbing Bureau and/or the local building department.

All questions and information on this portion of the project should be directed to

Dear LEGAL NOTICE DEPARTMENT:

Enclosed you will find three legal notices which we wish to have published in your newspaper on the dates indicated (once a week for two consecutive weekly issues). If you cannot publish the notices on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Please send the affidavit and bill to this office before 05/05/2003. Your cooperation is appreciated.

Sincerely

Sue Taylor
Senior Secretary

**SUBJECT: Application for Permit to Appropriate
 Public Waters from the State of Idaho
 Proposed Heritage Church for the
 Church of Jesus Christ of Latter-Day Saints
 18401 Northside Road, Nampa, Idaho 83687**

Gentlemen/Ladies:

On behalf of the Church of Jesus Christ of Latter-Day Saints, American Geotechnics, Inc. is herewith submitting (1) an "*Application for Permit to Appropriate Public Waters from the State of Idaho*," (2) an accompanying Vicinity Map showing the location of the requested appropriation, (3) a completed "*Request to Process*" form, and (4) a check for \$250.00 for the application fee. The requested appropriation will supply water to a proposed church to be located at 18401 Northside Road in Nampa, Idaho. The site is approximately four acres in area, and is situated in the northeast $\frac{1}{4}$ of the northeast $\frac{1}{4}$ of the southeast $\frac{1}{4}$ of Section 33 in Township 4 North, Range 2 West (Boise Meridian).

The requested appropriation includes (1) up to 2,500 gallons per day for the internal domestic needs of the proposed church, and (2) up to 1,750 gallons per minute for fire suppression needs. The supply for both internal domestic and fire suppression needs will be provided by groundwater from a future on-site production well. We anticipate that the well will be drilled to an approximate depth of 150 to 200 feet below ground surface and consist of six- to eight-inch diameter casing; however, we note that the final well construction will be determined by field conditions encountered at the time of drilling.

MICROFILMED

It is anticipated at this time that the well will contain two pumps. One pump will likely be dedicated to satisfying the daily domestic needs of the church. A second pump will likely be installed to replenish any water withdrawn from a proposed 180,000-gallon on-site storage tank dedicated to fire suppression needs. The requested appropriation of 0.33 cubic foot per second will allow replenishment of water pumped from the tank for fire suppression needs at a withdrawal rate of 1,750 gallons per minute for a period of two hours. The withdrawal rate includes a minimum flow of 1,500 gallons per minute, plus fire sprinkler needs, for fire suppression at the site, as required by the Nampa Fire Department. In addition, the requested appropriation will allow annual drainage and refilling (within a 24-hour period) of the 180,000-gallon storage tank. It is anticipated that the pumps will be plumbed separately to the church and storage tank.

As noted in the application, we anticipate that the maximum appropriated flow will be 0.33 foot per second to refill the storage tank once annually. The typical daily use from groundwater will not exceed 2,500 gallons per day. Any irrigation needs will likely be satisfied by a combination of the 2,500 gallons per day allotment of groundwater, use of existing surface water rights, and other available water sources.

Finally, we respectfully request that this application can be processed in an expedited manner so that the proposed construction can begin as soon as possible. Please feel free to contact us at (208) 658-8700 if you have any questions or require additional information.

On behalf of our client, we greatly appreciate the Department's assistance and attention to our request.

Respectfully submitted,

American Geotechnics, Inc
