Cherie,

I just read your email and listened to the voice mail concerning this application. First of all I would like to apologize for the application not being enter into the wild and scenic database. Sharla Curtis does that data entry, and she sent out an email to Shelley a week ago saying she couldn't find the spreadsheet. Well, Shelley didn't respond back to Sharla, so she was still thinking that the spreadsheet was out of commission. No that we have received confirmation that the spreadsheet is back up and running, Sharla entered in this application this morning. This is a simple misunderstanding and lack of communication. I apologize for saying that it was in the spreadsheet. You may want to send out a statewide email letting everyone know it is back up and running.

As for the documents you asked to be scanned into this file from 77-7161, I would be happy to include them in this file. The reason that I didn't add them into the file in the first place is that I have been reprimanded several times for putting copies of letters into a file that exist in other files. However, I will gladly include them, with your request to include them. I will also mention this in my memo on A006 Backfile. . I will get with Denise in our office and have them scanned today.

If there is anything else needed, please let me know.

Thank you.

Dan Nelson

Dan,
It sounds like there is some pertinent information that needs to get attached to this file from file 77-7161. I was wondering if you could attach the necessary documents to this file so they could be referenced without having to dig them out of the other file. I remember working on 77-7161 not too long ago and remember everything being in place with the necessary agencies, so I think this can get sent to advertising once the documents are attached. Just let me know when this is completed and I'll do a quick overview and get back to you about advertising. Thanks
Cherie

Subject: Wild and Scenic Application for Parallel Processing

Hello Cherie,

I understand that you are the new person working on the Wild and Scenic applications for permit. I have a new application for a James G. and Jeaney D. Campbell. This application is the result of a calamity of errors involved with his first application that I worked on with Erin Retelle. The first application is now a permit, 77-7161. All of the required additional information was acquired under that application, and we are not going to ask him to re-submit the same information for this permit. Please review 77-7161 when reviewing this application for parallel processing.

My memo for this application for permit is in A006 Backfile\water rights\permits\western region\Campbell 77-14280. We won't put this into PowerDOCs until we are ready to send it over to the State Office. Everything has been scanned into PowerDocs under the water right number.

Please review this application and memo, and tell me if anything else is needed prior to sending it to advertising.

Once it has completed adve ing, we will send it over to you for final pre ation and approval.

Thank you.
