Reference: Action 72881 "New Proposed Ammon well - 21st South in the "Villas""

Dear Dept. of Idaho Water Resources:

I wish to formally submit this letter concerning my existing water rights and the proposed new Ammon city well in the Villas on 21st South. I live very close to the new proposed well (<350ft). The well for my property has been functional since 1982 when the residence was completed. The depth of my existing well is approximately 130 ft. I am concerned that the new well and its proximity to my well will create an impact zone that will cause the water table to dip below my pump level. This will be very easy for me to prove since the water table in our area has never dropped below the level of my pump.

I just want my existing water right and water supply to be preserved and protected. If not, I think the City of Ammon should hook me up to the city supply (I am not opposed to annexation), or pay to have my well dug deeper so it is not impacted by the new city well.

Sincerely,

Charles Maggart
