Subject: Application for Amendment of Permit No. ⁶⁵~~63~~-23089, Eagle Springs Ranch LLC

Dear Steve,

Enclosed on behalf of Eagle Springs Ranch LLC is an application to amend permit no. ⁶⁵~~63~~-23089. This amendment requests the addition of six points of diversion, bringing the total number of diversion points to twelve. Although at this time we do not anticipate construction of wells at all points, this amendment will offer flexibility in siting future wells. As this project has progressed, some well location sites have shifted to quarter-quarters outside of those originally identified as intended well sites.

Permit ⁶⁵~~63~~-23089 was recently approved and the permit holder has begun construction and development under this permit. Since the only change requested is the addition of diversion points, it appears that this is a relatively simple modification that can be analyzed and processed quickly. We therefore request that if possible, processing of this application be expedited. One or more of the added points of diversion may be essential for phase 1 construction of this project, which is currently under way.

The application is signed by C. Lloyd Mahaffey, Managing Partner for Eagle Springs Ranch LLC. Also enclosed is a check for \$50 to cover fees for this application. Please contact me with any questions or requests for additional information.

Sincerely,

Scott N. King, P.E.
Senior Project Engineer
