Dear Ms. Cox:

In response to your letter dated May 9, 2007, enclosed please find answers to your questions regarding water appropriation applications #75-14461 and #75-14462.

If you have further questions, please contact my son, William R. Maxwell, at (208) 756-2616.

Thank you,

Gertrude I. Maxwell

A: Potential: See Map

Key to Map

The water moves through a 4" buried pipeline that has enough drop to operate over 50 9/64 field sprinklers under full pressure.

The following users have water rights from the pipeline:

1-Gertrude I. Maxwell	#14432 , #14434
2-Arden Arrington	#13948, #13950
3-Freddie Nott	#14381, #14383
4-Larry Shiley	# 83-B

This area was irrigated from a pre-existing ditch until it was damaged in a land slide in 1984.

B: Sufficiency

High water only will be used when the creek is overflowing into the river.

C: Good Faith

Private property, will be used for irrigated pasture only.

D. Adequacy

Pipeline in place, land owned without encumbrance. A valve will be attached to the end of the existing pipeline. The irrigation water to the property will be fed through a 2" poly pipe.

E. Local interest

All water in the pipeline goes to privately owned property.

F. Conservation

As previously noted, the property is privately owned, therefore a financial statement should not be required. There will be no financing for this project.

G: Impacts

There will be no impact to the local economy
