RE: Transfer No. 71132 - in the name of Timothy P. Deeg

Dear Mr. Spackman:

Application for Transfer No. 71132 was approved in a Preliminary Order dated May 23, 2006. In order to divert the full authorized amount (10.02 cfs) at the point of diversion, it was contemplated that it would be necessary for applicant to either install a larger pump in the existing well, or to drill a second well nearby with another pump.

Mr. Deeg has explored both possibilities, but each time he has approached the Idaho Power Company about the extra power needed for either a larger pump or for an extra pump, he has been advised that the company cannot provide the extra needed power at present. The most recent communication in response to Mr. Deeg's request from the power company came just about the time the one year period for accomplishing the change referenced in the May 23, 2006, Preliminary Order was to expire.

The inability of Idaho Power Company to provide the needed power has made it impossible for Mr. Deeg to meet the one year requirement of the Order and it is necessary to request an extension of the time within which to accomplish the change. We have not been able to obtain any predicted date when the extra power might be available, and so we request at least another year to finish this effort.

Gary Spackman
