

MEMORANDUM

TO: Steve Lester/Western Region

FROM: Pam Skaggs  State Office

SUBJECT: Transfer Returned to Region
Transfer 4122/Right 61-02165

DATE: October 23, 1998

This is the Simplot transfer that I left you a phone message about today. I have pulled the transfer information from the file & placed it back into a transfer file. This transfer has been around for years waiting to verify the well locations in order to eliminate further transfers to correct the legals.

Earlier this week I spoke to Vic Conrad about this transfer. He agreed that we should identify all the wells found by Shelley & Roxanne's GPS data (see memo of 03-11-96 & attached GPS map.). I told him that an amendment may be required & it is. He was undecided about the changes he might want if the transfer had to be amended & advertised to simply add the wells. He was thinking that he may want to start over with all the rights associated with the wells and create a single common permissible place of use.

Jim & I discussed the matter and decided the file should be returned to Western to either pursue a withdrawal & new transfer, or amend and advertise the existing transfer. You will need to discuss the matter with Vic Conrad.
