Subject: RE: Request to Temporarily Suspend Transfer Processing.

Vic:

The transfer you referenced is #67838 (previously numbered 4122). Processing will be delayed pending another transfer application to be filed as you discussed. Upon completion of the new transfer to be filed, we can revisit Transfer 67838 as needed and then take care of it. I will wait to receive something from you for the new transfer application to be filed.

Steve

Steve,
I apologize for the confusion. The reference below to the amendment filed November of 2003 should be November 12, 2002.

> Steve,
> On June 20, 2002, Simplot filed an application for transfer of water rights with the IDWR to change the place, nature and season of use for portions of irrigation rights in Basin 61. In an attempt to satisfy concerns expressed by the IDWR about the transfer, it was revised and an amendment to the transfer was filed on November 12, 2003 along with additional filing fees.
>
> I do not have any correspondence indicating whether a transfer number has been assigned to this application. I am providing the dates the transfer was filed and subsequently amended to help identify the correct transfer application.
>
> If this application is processing, please suspend any further action. I need to file another application for transfer involving one of the water rights included in that transfer. I intend to file the new transfer application next week. I need it to process in advance of the June 2002 transfer application. The new transfer application will probably

result
