Comment: This application proposes to change the place of use for a de minimus stockwater right, and also corrects the pod description. This is a very basic transfer that may not even need to be advertised, and should be approvable with minimal conditions. Allen agrees that the transfer does not need to be advertised, so I will prepare a draft approval and prepare the file for S. O. processing. Pam also felt that no advertising was needed.

Authority To File: The applicants have a quitclaim deed from the owner of this water right, so this is not an issue.

Some of the original pou was on federal land, and the applicant has obtained a written release from the BLM allowing the water right to be moved off of the BLM land.

Water Right Validity: The right was recently decreed in the SRBA, so this is not an issue.

Injury To Other Rights: There should be none, as the pod and usage remain the same. There should be no hydrologic impact from the proposed changes.

Enlargement of Use: None requested.

Local Public Interest: No issues identified.

Beneficial Use/Conservation of Water Resources: No issues identified.

Review of the application finds that there is no clear inconsistency with criteria set forth in Sec. 42-222 I. C. preventing processing. At least prior to advertising, no other issues have been identified that would require further review or submittal of additional data by the applicant.
