Re: Change POD for WR 63-32159

This water right has been split and re-split, as an inspection of the pedigree will show. Some of the POU shown on the license has been sold, and the new owners will eventually file change of ownership documents to effect further splits in the water right. Mr Craig wishes to remove the original points of diversion from the right and include a new point of diversion. Included in the map section is a well drillers log for the new well. We believe the legal description in the well driller's report is incorrect, and should be as stated in the Transfer Application. Please call me if you have questions. Thank You !
