Spring source collects into a drain field that carries water approximately 500 feet to irrigate a small pasture. Additionally, some water is carried via 1" and 2" pipe originally placed for culinary water to the Cove camp (housing for Cove hydro employees). The houses no longer exist.
Distance from source to place of use varies from 500 feet to 1300 feet. In total, approximately 5 acres is irrigated and no more than 10 animals are watered in these small pastures.
In about 1990, the Cove houses were torn down. However, stockwatering and irrigation has remained in place since the project was constructed in the early 1900's.
Some stockwatering occurs out of the Kackley Ditch which runs through the property. This open ditch is approximately 150 feet in length.
