RE: 79-14182 Request for Field Exam

Mr. Crivellone called today and requested a field exam in the next week or two in response to receiving acknowledgment for filing proof of beneficial use. He lives out of state and is concerned about meeting someone on-site near Grangeville.

The permit is for an existing exempted domestic well. He has a partly completed cabin built and uses the well when on-site.

I explained that we could not travel to Grangeville on short notice for this purpose. However, we have an alternate method to license single-family domestic wells that does not require an on-site exam.

His request was added to Western's "requested exams list" for follow up this summer.

His contact information remains the same as found in the database under 79-14182. His telephone number is for a cell phone that only works when he is not in the mountains.

Mr. Crivellone was satisfied with this approach.
