RE: Permit No. 15-7184

Dear Permit Holder:

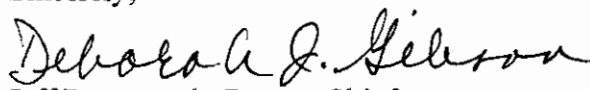

Enclosed is a copy of an Order that denies the request for extension of time ("extension") you filed with the department on April 12, 2007, in connection with the above referenced permit. This denial is a **"preliminary order"** issued by the department pursuant to Section 67-5243, Idaho Code. It can and will become a final order without further action of the department, unless a party (1) petitions for reconsideration within fourteen (14) days after the service date of the preliminary order, or (2) requests a hearing within fifteen (15) days after the service date of the preliminary order. These remedies are described in the attached information sheet.

Section 42-204, Idaho Code provides alternatives for an extension. You may file a second extension request based on delay caused by litigation that prevented you from proceeding with the development of the permit bringing your title to said water in question, or because of your failure to obtain necessary consent or final approval or rejection by the federal government because of pendency of an application for right of way or other matter within the jurisdiction of the United States. The request must include evidence supporting your delay. You may also file proof of beneficial use ("proof") on what you have completed.

This permit's proof of beneficial use deadline is June 1, 2007. To avoid loss of days from the priority date of this permit, please file either another extension or proof on or before that deadline.

I have enclosed a complete packet of forms for filing either proof or an extension. I also recommend that you contact the Eastern Regional office in Idaho Falls at (208) 525-7161 to explore your options for maintaining this permit or applying for another permit.

Sincerely,

for 
Jeff Peppersack, Bureau Chief
Water Allocation Bureau
