RE: Application for Transfer 72893

Dear Applicant(s):

The Department of Water Resources has received your application for transfer. Preliminary review of the application indicates that it is incomplete and cannot be accepted for processing. We are returning your application to allow you to complete the necessary items. The required information is described below.

The Permission to divert at new points of diversion was not provided correctly.

Our records show that you are not the owner of the land at the proposed new points of diversion. We need either evidence that you own that land or that you have permission from the current land owner.

The Proposed Point of Diversion was not provided in enough detail.

We are unsure what your intentions are with the new points of diversion please draw on the map where the new diversions are exactly. As we understand your applications you are proposing to move your water from Geertson Creek inject it into James Steel Gulch Creek and then divert the water downstream from the injection into pipeline. Please draw on the map the diversion from Geertson Creek, where you are injecting the water into James Steel Gulch Creek and where the pipeline begins.

The Department will hold further processing of your application for 30 days to allow submittal of the required information. Additional time may be granted by the Department upon receipt of a written request and sufficient justification for an extension. After that time, if adequate information is not received, the Department will issue a preliminary order to reject or deny the application.

Please feel free to contact this office if you have any questions.

Sincerely,

Trent Galbraith
Water Resource Agent
