RE: Request for Adjustment to Water Right 57-7059 to Increase Flow Rate

Dear Mr. Spang:

The Department of Water Resources recently received a letter from you on behalf of the Grand View Water & Sewer Association requesting an adjustment to water right 57-7059 to increase the flow rate. Water right 57-7059 is licensed for two points of diversion in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ NW $\frac{1}{4}$ and NE $\frac{1}{4}$ NW $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 22, Township 5 S, Range 3 E, and a total diversion rate of 0.50 cfs or approximately 224.4 gpm.

In the letter, reference is made to Well #2. Is this well one of the two points of diversion included in water right 57-7059?

In the letter, reference is also made to the Arsenic Removal Project. Will you elaborate on this project and specify associated water rights?

Since water right 57-7059 has received a partial decree pursuant to the Snake River Basin Adjudication, the diversion quantity cannot be adjusted. If you wish to increase the diversion rate from a well included in this water right, a new Application for Permit is necessary. Please respond to clarify the intention of the letter and include an Application for Permit if necessary. Thank you.

If you have any questions, please contact me at (208) 287-4947.

Sincerely,

Shelley W. Keen
Water Allocation Bureau
