Comment: Residency affidavit for hydropower development: N/A

Additional hydropower project information: N/A

Additional fish propagation project information: N/A

Appropriation Rule 40.05.c information: N/A

Mitigation Plan or acceptance form: N/A

Evidence of Pre-1987 development: N/A

5. jstanton 2/3/2006 Comment/Analysis

Comment: This application covers new irrigation and domestic uses on a small parcel of land recently purchased by the applicants. The parcel is just south of the parcel covered by Application 72-16645. I did confirm that there will be a separate water system (well, motor, pump, etc) on each parcel; the well for the first application has already been drilled, while a new well will be drilled under this filing. The new app was filed only in the name of Mr. Strobe, but he asked me to add his wife when I spoke to him on the phone; I put and/or between the names so we could hopefully get by with only his signature. The SDE shapes for the 2 apps are probably not exactly correct, but I did the best I could with conflicting information from govt lot lines, the county taxlot data, and the physical features in the area; the license examiner will have to verify the actual pous and pods. The app appears to be approvable with standard conditions.

Effect On Other Water Rights: This small use should not impact other users on the Salmon River.

Sufficiency Of Water Supply: The available groundwater supply is unknown, but should be sufficient for the proposed uses.

Application Made In Good Faith: I talked to Dr. Strobe on 3-37-07 at his Florida home. He said that the well was drilled on this property last fall, but that no other development has been done. He plans to develop this parcel for resale, probably at a large profit. He lives on the parcel next door about 6 months out of the year, so will have plenty of time to work on this project.

Financial Resources: This does not appear to be an issue.

Local Public Interest: The applicants have solicited comments from interested agencies, and comments have been received from the Idaho Departments of Fish & Game & Environmental Quality; no negative comments or concerns have been raised.

Beneficial Use/Conservation of Water Resources: The proposed uses are standard beneficial uses. Irrigation will be via sprinklers for maximum efficiency of water use.

Review of the application finds there is no clear inconsistency with criteria set forth in Sec. 42-203A of the Idaho Code, or with the Water Appropriation Rules (IDAPA 37.03.08) preventing processing of this application.

6. jstanton 2/3/2006 Legal Notice Remarks

Comment: This application proposes to drill a new well to provide water for irrigation and domestic uses on a small parcel of land recently purchased by the applicants. The property is located between the Salmon River and Hwy. 75 about 5 3/4 miles below Clayton, Idaho.

7. jstanton 3/27/2007 4:05:09 PM Special Administration Area Notes

Comment: Special Administration Areas : Salmon River Moratorium Area

Exempt: N

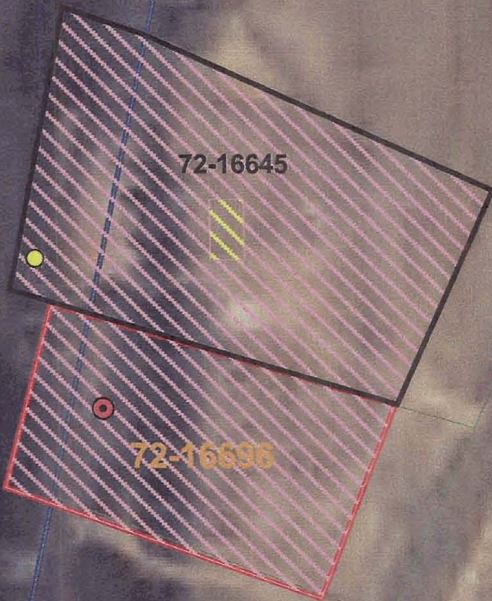

Reason:

Doc Attached:

Explanation:

8. jstanton 3/27/2007 Drilling Permit Fee

Comment: This well was drilled as a domestic well under Permit 842235, but will also be used to irrigate more than 1/2 acre. So an additional fee of \$125 is due before the permit is approved.

Hwy 75

An aerial photograph of a rural area with a property map overlay. The map shows a road labeled 'Hwy 75' running diagonally from the bottom left towards the top right. To the right of the road is a large, irregularly shaped area outlined in blue, representing a section of land. Within this blue-outlined area, there is a smaller, roughly rectangular area outlined in red. This red-outlined area contains a yellow dot with the number '72-16696' next to it. Above the red-outlined area, there is a white, irregularly shaped area with a black dot. The background is a grainy, high-contrast aerial image showing fields and some structures. Two white circular punch holes are visible at the top of the page.
