

MEMORANDUM

TO: Files 36-02586A & 36-14035A

FROM: Pam Skaggs/State Office

SUBJECT: Transfer 5128 *CS*

DATE: July 20, 1999

Transfer 5128 changes and adds a second point of diversion, changes the place, nature and season of use under a portion of Right 36-02586A and 36-14035A, splitting each right into Parts C and D. The applicant is changing 19.9 acres of irrigation to stockwater and commercial use to provide water for expansion of an existing dairy. The total rate of diversion was reduced by the applicant to reflect system capacity.

Two existing wells will be associated with this dairy, although no evidence of drilling permits for these uses was found in the database. No new wells will be drilled. The application was prepared when diversion volume was the standard and has been processed using the same. Recommended conditions include drilling permit requirements, no new wells, water quality requirements, county zoning, multiple points of diversion/measuring devices combined right limits and standard transfer conditions.
