Re: Ownership Change 63-10659

John Westra has been working with some water users in the subdivision involved in this ownership change. The right is currently in the name of the Hoyt's who sold the property to a developer. The developer is now long gone and the lot owners have formed a homeowner's association.

The Articles of Incorporation for the association are attached as well as a printout verifying the association's status with the Secretary of State's office for doing business in Idaho. I have also attached an aerial photo map that I prepared to show the place of use identified by the water right. I included the Ada County Assessor's office taxlot information which I used to indicate the lots owned by the 3 directors named in the Articles of Incorporation.

I hope this is sufficient documentation for you to make the ownership change. Short of getting every owner of the subdivision to submit proof of their ownership, John and I couldn't think of any other way of handling the change. If you need additional info from us or you want us to get something additional from the association, just let me know.

Thanks.
