Re: Season of Use

Season of use for irrigation from storage cannot provide beneficial use year round. The season of use has been updated from 1/1-12/31 to 3/15-11/15 per administrative process in ArcView. There is also another water right, 37-12868, pending in the SRBA. Since that water right is still pending in adjudication, I added a disclaimer to the conditions on the permit to consider this water right once the adjudication process is complete.
