Department of Water Resources
Water Right License

WATER RIGHT NO. 63-11681

Priority: February 26, 1992

Maximum Diversion Rate: 0.20 CFS
Maximum Diversion Volume: 27.9 AF

It is hereby certified that MERIDIAN JOINT SCHOOL DIST NO 2
911 MERIDIAN ST
MERIDIAN ID 83642 has complied with the terms and
conditions of the permit, issued pursuant to Application for Permit dated February 26, 1992; and has
submitted Proof of Beneficial Use on February 1, 1996. An examination indicates that the works have
a diversion capacity of 0.29 cfs of water from:

SOURCE

GROUND WATER

and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>DIVERSION RATE</u>	<u>ANNUAL DIVERSION VOLUME</u>
IRRIGATION	03/01 to 11/15	0.20 CFS	27.9 AF

LOCATION OF POINT(S) OF DIVERSION:

GROUND WATER NE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 33, Twp 04N, Rge 01E, B.M. ADA County

PLACE OF USE: IRRIGATION

Twp Rge Sec	NE	NW	SW	SE	Totals
04N 01E 33	NE NW SW SE	NE NW SW SE	NE NW SW SE	NE NW SW SE	6.2

Total Acres: 6.2

CONDITIONS OF APPROVAL

1. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with ground water diverted under this right and shall only divert ground water under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
2. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
3. This right when combined with all other rights shall provide no more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

MAR 1 1993

State of Idaho
Department of Water Resources
Water Right License

WATER RIGHT NO. 63-11681

CONDITIONS OF APPROVAL continued

4. This right when combined with all other rights shall provide no more than 0.04 cfs per acre nor exceed a combined annual maximum diversion volume of 27.9 af at the field headgate for the lands above.
5. The right holder shall maintain a totalizing measuring device of a type approved by the Department as a part of the diverting works.
6. After specific notification by the Department, the right holder shall measure and annually report diversions of water and/or other pertinent hydrologic and system information as required by Section 42-701, Idaho Code.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed and sealed this 20TH day of DECEMBER, 2002.

CONDITIONS OF APPROVAL AND REMARKS

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before May 1, 1996.
2. Subject to all prior water rights.
3. Prior to diversion of water under this right, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to use power records to determine the amount of water diverted from each point of diversion listed under this right.
4. The right holder shall measure and annually report diversions of water and other pertinent hydrologic and system information as required by Section 42-701(5), Idaho Code.
5. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right.
6. The rate of diversion of water for irrigation under this right and all other water rights on the same land shall not exceed 0.03 cubic feet per second for each acre of land.
7. This approval does not authorize the construction of any new well or the deepening or enlargement of any existing well.
8. Failure to comply with any condition of approval is cause for the Director to cancel this right.

MERIDIAN ID 83642

RE: License No. 63-11681 - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

Shelley W. Keen

Water Rights Supervisor

CERTIFICATE OF SERVICE

I hereby certify that on December 20, 2002 I mailed a true and correct copy, postage prepaid, of the foregoing PRELIMINARY ORDER(Approved License) to the person(s) listed below:

RE: WATER RIGHT NO.

63-11681

**MERIDIAN JOINT SCHOOL DIST NO 2
911 MERIDIAN ST
MERIDIAN ID 83642**

**Kari Lynn Townsend
Secretary**

MICHOE MWEB
PAGE 1 / 2003

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

APR 17 2003

MEMORANDUM

Date: December 18, 2002
To: Water Right File 63-11681
From: S. Keen *(signature)*
Re: Licensing Review

Licensing review and data entry by S. Keen on 12/18/2002.

This is a supplemental right. The right holder reported no diversion in 1996 and 1997. Reporting has been discontinued, but could be resumed in the future. Therefore, the right holder will be required to maintain the measuring device that is in place already. The diversion capacity is at least 0.28 cfs as reported by the examiner. The system was measured at 0.29 cfs in 1996 when it was not running at full capacity. System capacity is more likely around 0.45 cfs, which would balance with the capacity of the relift pump from the sump. The field examiners theoretical used a pressure reading that is probably high. Since the right holder has the capacity to divert at least the 0.20 cfs permitted, that amount will be licensed, even though it exceeds the 0.03 cfs per acre limit imposed on the permit. The right holder could justify a higher rate per acre because it is for the irrigation of public space, which cannot be irrigated round the clock.

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
N/A						

2. Measurements:

Bryce Contor calibrated the flow meter in 1996 on this well, but the measurement was not done at capacity. The owner of the well was not using the well during the time of the exam, so a theoretical calculation and the use of the pump curve were used to determine the flow rate. There is a large discrepancy between the flow rate measured by Mr. Contor and the theoretical, but I am sure that the system was not operating anywhere near capacity considering the number of sprinkler heads being used during Mr. Contor's measurement.

63-11681

E. NARRATIVE/REMARKS/COMMENTS

The water for this permit is diverted from the well and transported in a southeasterly direction to the distribution box. The distribution box collects water from both the well and Settlers Irrigation District. At the distribution box a 7.5 Hp Baldor relift pump sends the water from the distribution box into a mainline that runs along the eastern border of the Schools property that feeds handlines used to irrigate the main playground for the school. There are several smaller yard/playground type areas to the north, south, and west of the school building, but these areas are irrigated with water from United Water. Only the west field is irrigated from the canal and the well.

OVERLAP

There are no overlapping rights for this point of diversion. This water right is a supplemental right to the Settlers Irrigation District water used to irrigate the field. United water rights are also used inside the school and to irrigate the remaining ground not covered by canal water or this permit.

RECOMMENDATIONS:

This permit originally applied for 1.5 inches of water per acre or 0.03 cfs per acre. The reasoning behind this is that field irrigated is a playground and the owners cannot irrigate when the children are using the playground areas. Therefore, I recommend that this permit be licensed for 0.19 cfs for irrigation of 6.2 acres and an annual volume of 27.9 afa. This permit when licensed should not allow more than 0.03 cfs or 4.5 afa when the well rights are combined with the Settler Irrigation District rights and/or any other rights.

Have conditions of permit approval been met? X yes ___ no

MICROFILMED

MAY 17 2003

63-11681

F. FLOW CALCULATIONSYES Additional Computation Sheets Attached

Measured Method:

Theoretical calculation = 0.28 cfs
Pump curve = 0.29 cfs
Permit allows = 0.20 cfs
Acre limitation = 0.19 cfs (6.2 acres X 0.03 cfs/acre = 0.186 cfs)

This application should be limited to maximum allowed by the rate per acre of 0.19 cfs

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 6.2 \times 4.5 = 27.9 \text{ afa}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 0.19 \times 260 \times 1.9835 = 98.0 \text{ afa}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 27.9 \text{ afa}$$

B

2. Volume Calculations for Other Uses:

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial use	Period Of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
	From	To		
IRRIGATION	3/1	11/15	0.19 CFS	27.9 AFA
TOTAL			0.19 CFS	27.9 AFA

2. Recommended Amendments

☐ Change P.D. as reflected above ☐ Add P.D. as reflected above ☐ None
☐ Change P.U. as reflected above ☐ Add P.U. as reflected above ☐ Other

GROUNDWATER THEORETICAL ANNALYSIS

FILE: 63-11681

DATE: 1-2-2002

BY: DANIEL A. NELSON

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8 \times (\text{HP}) \times (\text{EFF.}))}{\text{TDH}}$

Q = CFS

HP = Total Brake Horsepower of pumping plant (including booster)

Eff. = Pumping plant efficiency (assume 70% or 0.70)

TDH = Total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = Depth to water in FEET from land surface to pumping water level

PSI = Pumping pressure measured in PSI near pump (if open discharge assume [0])

$$Q = \frac{(8.8) \times (10 \text{ HP}) \times (0.70)}{[(81) + (60 \times 2.31)]} = 0.28 \text{ CFS}$$

126 gpm.

<u>LIFT FROM:</u>	<u>PSI FROM:</u>	<u>NOTES ON PUMP:</u>
Measurement ()	Measurement ()	Motor Make, Serial or ID
Owner ()	Owner ()	
Area estimate ()	Estimate (X)	Pump Make, Serial or ID, rating
Well Logs (X)	Owner Gage ()	
Booster (Y) (N)		

REMARKS: The LIFT WAS TAKEN FROM THE
WELL LOGS. THE ~~22~~ CASING SCREENS ARE SET
AT 76-86 FT. I ESTIMATED THAT THE PUMP WAS
SET IN THE MIDDLE OF THE SCREENS AT 81 FT.
THE PSI WAS ESTIMATED HIGH ON THIS
WELL. IN LOOKING AT THE METER PLACEMENT
SHOWN IN THE CALIBRATION BY BRYCE CENTER
THE PIPING IS REDUCED TO ALLOW FOR
METER INSTALLATION. THIS WOULD CAUSE SOME
BACK PRESSURE ON THE PUMP, EVEN THOUGH
THE PUMP OPEN DISCHARGES. THIS AMOUNT MATCHES
THE PUMP CURVE AND ALLOWS THE PUMP TO
OPERATE WITHIN THE PUMPS EFFICIENCY RANGE.

SECTION II. CERTIFICATION FOR CALIBRATION OF A WATER MEASUREMENT METER

NOTE: Permanently installed flow meters must be calibrated at the time of installation and at least once every four years or whenever major repairs or maintenance has been performed. All documentation to support data such as notes, printout tapes, etc., should be attached to this form for submittal.

Measurement No. 1 (M_1) is the measured rate of flow from the permanently installed flow meter.

Measurement No. 2 (M_2) is the measured rate of flow from the measuring device being used to check the flow for the calibration. This method or device must be accurate to within $\pm 5\%$ error. Describe below the method and equipment used to perform this measurement.

Peak polysonic 10 min totalizer

check w/ Fuji polysonic

Percent Difference = $(M_1 - M_2) \div M_2 \times 100 = \pm \%$ (Acceptable is within $\pm 10\%$)

Re: 1997 Water Measurement Reports and Fees for the following diversions:
63-11681 & 63-11825

Dear Wateruser:

NOTICE OF PENDING ORDER VOIDING PERMIT

The records of the Department of Water Resources (Department) show that you have failed to complete and submit the 1997 water measurement report forms and reporting fees for your diversions 63-11681 and 63-11825. You are reminded that there are conditions listed on your permit to measure and report. See our correspondence to you in relation to this issue dated April 27, 1998. Also enclosed in that correspondence was a report form.

If you fail to submit your reports and the \$25.00 per diversion (if water was diverted) reporting fee by **June 2, 1998**, a **PRELIMINARY ORDER VOIDING PERMIT WILL BE ISSUED**.

If you have any questions or feel that our records are incorrect, you may contact Water Distribution Section at (208) 327-7907.

Sincerely,

A handwritten signature in cursive script that reads "Tim Luke".

RE: Water Right No. 63-11681

Dear Water Right Holder(s):

Early in 1996, the department issued the above referenced permit to you authorizing the diversion of water from a well(s) to be used to supplement the irrigation of land which is primarily irrigated with surface water shares. Most of these permit applications were originally filed in 1992 and are sometimes referred to as "1992 drought permits".

The purpose of this letter is to specifically call to your attention some of the conditions of approval dealing with use of water under your permit(s). Please note the following:

- You are required to measure and annually report to the department the amount of water you have diverted from your well. This includes the amount of water diverted during the 1996 irrigation season.
- You are required to use all of the surface water to which you are entitled each season in connection with use of water under your permit.
- If you sell, transfer, lease or use your surface water rights on any other place of use, the permit issued to you to divert supplemental groundwater is not valid.

The department plans to field inspect use of water under the drought permits to determine compliance with the conditions listed on the permits.

If you have questions, please feel free to contact the department.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

cc: IDWR - W. Region

PROOF ACKNOWLEDGEMENT LETTER

RE: PERMIT NO. 63-11681

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that one of the conditions of your water right permit requires that the permit holder install a measuring device or enter into an agreement with the department to use power records to determine the amount of water diverted from this right (refer to condition #3 of your permit.) If you have any questions regarding the installation of the measuring device or your options, please contact Scott King or Gary Spackman at (208)327-7900.

If you have questions concerning the field examination, please feel free to contact the WESTERN Regional Office in Boise, at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-11681

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Please note that one of the conditions of approval on your permit requires that you install a measuring device or sign an agreement with the department to determine your diversion using power records prior to diverting water. You may choose to install a measuring device, or you may ask the department to review your system to determine whether your diversion can be estimated with power records. Another condition of approval requires that you measure your diversion and record other important hydrologic and physical features and report them annually to the department. The department will shortly send you further information about measuring devices, flow estimation using power records, and annual reporting forms. If you have questions about these requirements, please call the department at (208) 327-7900 and ask for someone in the Water Distribution Section.

GOVERNOR

KARL J. DREHER
DIRECTOR

May 19, 1995

Distribution: Applicants Whose Water Right Applications Were Held
Without Action Under the Boise River Basin
Moratorium

Dear Applicant:

As you might be aware, on May 3, 1995 the Director of the Department of Water Resources, Mr. R. Keith Higginson, signed an Amended Moratorium Order which provides for the processing of previously held applications within the Boise River Basin, with certain restrictions. Enclosed for your information is a copy of the Order.

As provided in the Order, this office will resume the processing of these applications in order of priority at a rate of 30 applications per month. Depending on how many applicants wish to proceed with development of their projects, the processing of the 338 presently-held applications could require as much as a year. To enable you to make an estimate as to when your application(s) will be processed, please be advised that 244 of the applications have priority (receipt) dates of 1992; 32 are dated 1993; 37 are dated 1994; and 25 are dated 1995.

As new applications are received, they are sorted into two groups. Those that would not have been held back under the moratorium are processed immediately. To assure fairness in processing, those that would have been held back under the moratorium, such as irrigation applications, are placed at the end of the moratorium processing line.

Note that the Order requires that all applications held under the moratorium will be advertised (or re-advertised if previously advertised), in order to enable neighboring water users to examine the proposed uses in view of water availability information gained during recent drought years. There will be no additional charge to the applicants for this process. For applications that propose use of ground water, the advertisement must include an indication of the depth interval from which the applicant proposes to withdraw water.

Please find enclosed a Profile Report which provides information from our water rights data base describing each of your moratorium-held applications. In addition we have included one response form for each application, which enables you to indicate whether you wish to proceed with processing of your water right application(s).

JAN 24 1996

May 19, 1995

In case you no longer intend to develop a water use as described on an application, please complete and return the enclosed Withdrawal Form. Because of the time and effort already devoted to researching water availability in the Boise River basin, the Department will not be able to provide refunds of fees for applications that are withdrawn.

If you have questions about this process, or if you need assistance in completing the response form, please feel free to contact this office at (208) 334-2190. Response forms received no later than May 31, 1995, will be used in compiling the applications that will be advertised during June.

Sincerely,

David R. Tuthill, Jr., P. E.
Manager, Western Region Office

RE: PERMIT NO. M63-11681

REINSTATEMENT OF PERMIT APPROVAL

Dear Reinstated Permit Holder(s):

Enclosed is an reinstatement order **authorizing diversion of water** under the above referenced permit.

The Department has reinstated your permit for the remainder of the 1994 irrigation season and the reinstatement will expire on November 15, 1994. When your permit expires, you must make the pump and motor inoperable, and you cannot operate the pump without approval from the Department of Water Resources. The Director may reinstate the permit again next year if drought conditions persist.

Please remember water diverted under your reinstated permit is only to be used on the lands identified on your permit. You must obtain the approval of the Department before using your water anywhere else.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If you have any questions please let me know.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

JJ:dc

Enclosure

AUG 08 1994

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF APPLICATION)
FOR PERMIT NO. 63-11681 IN)
THE NAME OF SCHOOL DISTRICT)
NO 2)
_____)

REINSTATEMENT ORDER

This matter having come before the Idaho Department of Water Resources (department), as a result of drought conditions being experienced during the 1994 irrigation season, the department makes the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT

1. In May 1992, the department issued the above captioned temporary permit (permit) to use ground water during the 1992 irrigation season to offset the effects of the drought and the associated reduced surface water supply. The permit expired on November 15, 1992.

2. The permit was conditioned that the Director of the department retained jurisdiction to reinstate the permit if drought conditions justify resumption of ground water use.

3. Water supply conditions during 1994 justify reinstatement of the permit by the Director.

CONCLUSIONS OF LAW

1. The Director is authorized under Chapter 2, Title 42, Idaho Code, to issue water right permits authorizing the diversion and use of the state's water resources.

2. The Director should reinstate the above captioned permit with certain conditions and limitations.

ORDER

IT IS THEREFORE, HEREBY ORDERED that the above captioned permit is **REINSTATED** with the following conditions and limitations:

1. The permit expires on November 15, 1994.

2. The right to divert water under the above captioned permit is void if the surface water appurtenant to the place of use has been sold, transferred, leased or used on any other place of use without the approval of the department.

RECEIVED

AUG 08 1994

3. The permit holder shall use the full allotment of surface water to the extent it is available before diversion is authorized under this reinstated permit.

4. The permit holder shall employ reasonably efficient methods of water application to conserve the water of the state of Idaho.

5. The rate of diversion of water for irrigation under this right and all other rights shall not exceed 0.02 cfs for each acre of land.

6. This use is subject to all prior water rights.

7. The place of use authorized is only that shown on the permit. Permit holder shall prevent use of this water on land for which it is not authorized.

8. This reinstatement does not authorize the construction of new wells or the deepening of existing wells.

9. Failure to comply with the above conditions and limitations of permit use voids this reinstatement.

Dated this 25th day of July, 1994.

DROUGHT RELIEF QUESTIONNAIRE

RECEIVED

JUL 27 1994

If you are not interested in having a 1994 temporary permit reinstatement, or if you did not drill a well in 1992, disregard this questionnaire. No response is necessary.

Please answer the questions below. Your answers will help the department assess the need for use of the wells to complete the 1994 irrigation season and the extent of water use that will occur if the department again authorizes use of the wells.

1. Temporary permit identification number. M63-11681
(See cover letter)

2. a) Person responding to this questionnaire

Chuck Lieke

b) Relationship to applicant? Meridian Sch. Dist. employee

3. Do you expect to use all of your surface water supplies for the land identified on the attached application prior to the end of the 1994 irrigation season? Yes X No

4. What is the source of supply? (Name of Canal)

Snider

5. What date do you expect this to occur? Estimate Aug. 26

6. List the type of crop, acreage and volume of water in acre feet (AF) needed under the temporary permit to complete the 1994 irrigation season. List only for the lands included in the land list of the attached application for permit.

CROP	ACRES	ACRE FEET
<u>lawn - athletic fields</u>	<u>7</u>	<u>balance needed for remainder of season</u>

This questionnaire needs to be completed and returned to the department by August 1, 1994 in order to be considered as a request to reinstate a temporary permit.

Dear Sir:

The Meridian School District is experiencing serious irrigation problems at Meridian Middle School. We are not only having problems getting a sufficient supply of water, but, our irrigation pump has broken down. We have requested that Mayne Pump look at it, but they are too busy to get to it immediately. This situation is very serious and we have made every effort to correct it.

Laurie Graves inspected our well today. She can verify the seriousness of our problem.

Please consider lifting the ban on the use of the irrigation well at Meridian Middle School. Any assistance you can give will definitely be appreciated.

Thank you for your attention to this matter.

Sincerely,

Chuck Liehe

RE: Water Right No. M63-11681

Dear Water Right Holder(s):

In 1992, the Department issued you a temporary permit to use groundwater from your well, if you drilled one, to replace depleted storage water supplies. This temporary permit expired on November 15, 1992.

During 1994, since available surface water supplies are again substantially below normal, the department has received a number of requests to re-authorize use of the "1992 drought relief" wells.

The department is willing to consider reinstating the temporary permits for the remainder of 1994 provided you can show that you used water under the 1992 temporary approval and that water will be used only on the lands identified on the temporary permit. Enclosed is a questionnaire which you must complete and return to the department if you want to be considered for reinstatement in 1994.

Also enclosed, for your reference, is a record of your application for permit.

Please be advised that unless the department specifically reinstates the expired permit, you are not authorized to divert and use the water from the well identified on the temporary permit.

If you have any questions, please feel free to contact me at Ph. 327-7947.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

MERIDIAN ID 83642

RE: Water Right No. M63-11681

Dear Water Right Holder(s):

In 1992, the Department of Water Resources issued the above referenced permit allowing the diversion of water for the 1992 irrigation season only. The permit included a condition:

This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.

It now appears that 1994 early season water supply and precipitation conditions are such that short-term use of the wells that were drilled under this authority could be beneficial prior to the start of water delivery through the canal systems in the Boise Valley. We have been advised that most of the canals will not be able to deliver water for another 10 to 14 days.

Therefore, you are hereby notified that the permit is reinstated for temporary use during the period April 1 through April 15, 1994 only. All other conditions of the permit continue to apply. One requirement was that the well be disconnected from the power system at the end of the approved period of use, which under this reinstatement is April 15, 1994.

The existing moratorium in the Boise Valley area is not changed by this temporary reinstatement of the 1992 drought well permit. This temporary reinstatement does not authorize the construction of a new well or alteration of an existing well.

If you have any questions, please contact this office.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

RE: Illegal Diversion of Water

Dear Mr. Liehe:

Enclosed is a Cease and Desist Order in the above referenced matter.

If you disagree with the decision of the Director, you may request a hearing within fifteen (15) days of the date of this order pursuant to Idaho Code §42-1701A.

Sincerely,

David R. Tuthill, Jr., P.E.
Manager, Western Regional Office

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF TEMPORARY	)	
	)	ORDER TO
PERMITS NOS. M63-11681 AND M63-11825	)	
	)	CEASE AND DESIST
<u>IN THE NAME OF SCHOOL DISTRICT NO. 2</u>	)	

The Director of the Department of Water Resources (Department) being charged with the duty of protecting vested water rights and enforcing specific statutes of the State of Idaho and the rules promulgated by the Department, has been authorized to order the cessation of violations or attempted violations of the provisions of law relating to all aspects of the appropriation of water. Based on the Director's investigation of the application of water by School District No. 2 and his understanding of the law, the Director finds, concludes and orders as follows:

FINDINGS OF FACT

1. On May 15, 1992, the Director of the Department issued a moratorium preventing the issuance of certain water rights within the Boise River basin, and establishing provisions for the issuance of temporary water rights.

2. On May 22 and July 14, 1992 the Department issued to School District No. 2 Moratorium Permits Nos. M63-11681 and M63-11825, respectively. Both approvals were conditioned with the following requirement:

This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify the resumption of ground water use.

3. Because 1993 is an average year for surface water runoff in the Boise River basin, wells drilled under moratorium permits are not authorized to be pumped.

4. On July 29, 1993, Department personnel conducted a routine inspection of moratorium permits that had been issued during 1992,

to ensure compliance with conditions of approval. This inspection revealed that the wells drilled under permits M63-11681 and M63-11825 have apparently been used illegally during the summer of 1993.

CONCLUSIONS OF LAW

1. Idaho Code §42-351 provides in part as follows:

If the director of the department of water resources finds, on the basis of available information, that a person is diverting water from a natural water course or from a ground water source without having obtained a valid water right to do so or is applying water not in conformance with the conditions of a valid water right, then the director of the department of water resources may file an action seeking injunctive relief or may issue an order directing the person to cease and desist the activity or activities alleged to be in violation of applicable law or of any existing water right.

2. Idaho Code §42-103 provides as follows:

The right to the use of the unappropriated waters of rivers, streams, lakes, springs and of subterranean waters or other sources within this state shall hereafter be acquired only by appropriation under the application, permit and license procedure as provided for in this title, unless hereinafter in this title excepted.

3. Water has been diverted as described in the findings of fact in violation of the statutes of the State of Idaho and Water Appropriation Rule 3,1,1.

4. The illegal diversion of the public water of the State of Idaho must be stopped to prevent injury to other water rights, to protect the water resources of the state, and to assure that the allocation and use of available water supplies take place in an orderly manner. In the absence of District action to stop expanded and improper use of water, the Department is empowered to take regulatory action.

5. Idaho Code §42-352 provides in part as follows:

Any person who wilfully violates any cease and desist order issued under Chapter 3, Title 42, Idaho Code, after the same has been served on that person

shall be subject to a civil penalty to be imposed by the director of the department of water resources not to exceed one hundred dollars (\$100) per diversion for each calendar day, or any part of a calendar day, following service of the cease and desist order in which the illegal diversion or use of water occurs.

6. The Director should issue a cease and desist order pursuant to the authority of Idaho Code §42-351.

ORDER

IT IS HEREBY ORDERED that School District No. 2 shall immediately CEASE AND DESIST the diversion and use of water as described above.

IT IS FURTHER ORDERED that School District No. 2 not resume the use of water until the Director modifies or rescinds this order or otherwise authorizes the diversion and use of water.

IT IS FURTHER ORDERED that School District No. 2 pay one hundred dollars (\$100) for the use of water for each calendar day or portion thereof that illegal diversion and/or use of water occurs following the service of this cease and desist order.

Dated this 2ND day of August, 1993.

R. KEITH HIGGINSON, Director
Department of Water Resources

May 22, 1992

MERIDIAN SCHOOL DISTRICT #2
911 MERIDIAN ST
MERIDIAN ID 83642

RE: PERMIT NO. 63-11681

LETTER OF PERMIT APPROVAL

Dear Permit Holder:

Enclosed is a copy of your approved permit. Your proposed use of water qualifies for a narrow exception to the Snake River Basin Moratorium established by the Director on May 15, 1992. The exception allows the use of groundwater during the drought to protect agricultural uses which normally have an adequate supply of water. Please carefully review the conditions of approval.

The Department has approved your permit for the 1992 irrigation season. Diversion of groundwater is not authorized after the 1992 season, and the permit expires. The Director may reinstate the permit in a subsequent year if drought conditions persist. You will be responsible for requesting reinstatement during future irrigation seasons.

When your permit expires, you must make the pump and motor inoperable, and cannot operate the pump without approval from the Department of Water Resources.

Your permit is for supplemental use only to augment your surface water supply. If the surface water you own is sold, transferred, leased or used on any other land without the approval of the Department of Water Resources, you automatically lose your right to divert groundwater. You must obtain the approval of the Department before using your water anywhere other than where it has traditionally been used.

In addition, you must fully utilize your available surface water to the extent possible. The surface water need not be fully consumed or diverted prior to use of groundwater. You cannot, however, simply divert token quantities of surface water and rely primarily on your groundwater diversion. Surface water must be your primary source of water.

RECEIVED

AUG 08 1994

If you want to locate your well closer than 500 feet from an existing well, you must obtain the approval of the Department of Water Resources. We realize that under certain circumstances, it may be impossible to locate the well 500 feet away from another well. You must, however, be cognizant of possible interference resulting from pumping of your well.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If general water levels in the geographical area of your well decline below reasonable levels, the Department may require you to cease diverting from your well.

You must efficiently apply the water to the land and conserve water to the extent possible. Excessive irrigation, delivery systems with substantial losses, and application methods which cause substantial percolation or evaporation are not acceptable.

Sincerely,

JIM JOHNSON
Water Right Supervisor

JJ:cz

Permit To Appropriate Water

NO. 63-11681

Proposed Priority: February 26, 1992 Maximum Diversion Rate: 0.20 CFS

This is to certify, that SCHOOL DISTRICT NO 2
911 MERIDIAN ST
MERIDIAN ID 83642

has applied for a permit to appropriate water from: GROUNDWATER
and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
IRRIGATION	03/15 to 11/15	0.20 CFS
	Totals	0.20 CFS

LOCATION OF POINT(S) OF DIVERSION: NENW, Sec. 33, Township 04N, Range 01E
ADA County

<u>PLACE OF USE:</u>	<u>IRRIGATION</u>					
<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
04N	01E	33	NENW	7		7

Total number of acres irrigated: 7

CONDITIONS/REMARKS:

1. This permit to appropriate water expires on November 15, 1992 (end of irrigation season). The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.
2. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
3. This right to divert groundwater is void if the surface water right appurtenant to the place of use is sold, transferred, leased or used on any other place of use without the approval of the Department.
4. The permit holder shall use the full allotment of his surface water right to the extent it is available in conjunction with groundwater diverted pursuant to this permit.
5. The permit holder must employ reasonably efficient methods of water application to conserve the water of the State of Idaho.
6. The permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
7. Construction of the well must comply with Idaho well construction standards.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is

approved

Date

May 22, 1992

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum distance of 50 feet and 100 feet respectively from a septic tank.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

SPECIFIC CONDITIONS:

10. THE WELL MUST BE LOCATED AT LEAST 500 FEET FROM ANY EXISTING WELL. WELL SPACING CLOSER THAN 500 FEET MUST BE APPROVED BY THE DEPARTMENT OF WATER RESOURCES.
11. THE WELL DRILLER IS REQUIRED TO SUBMIT A DRILLING PROSPECTUS TO THE DEPARTMENT OF WATER RESOURCES FOR REVIEW AND APPROVAL PRIOR TO CONSTRUCTING THE WELL.

Boise, ID 83704

Dear Sir:

Re: Pioneer School Well Permit Application #63-11681

The Meridian School District has taken action so that it will now be possible to use surface water to irrigate the lawns and playing fields at the school.

We have purchased a power take-off (PTO) driven centrifugal pump. We need 300 gpm at 60 psi and this pump is capable of much more. We plan to pump out of the irrigation ditch and by using an adapter, hook into the underground 4' line, through a riser. (If more detailed information is needed concerning this process, contact John Burgess at Burgess Pump Co., 939-6603.)

The surface water rotation at Pioneer school is 14 days. We will get approximately 10 inches of water for 24 hours. This surface water will be used to its fullest. We must, however, pump from the well frequently, when surface water is not available, this year to get the new seeding growing and the lawn established.

We understand fully that well water will be supplemental only and that we are required to use surface water first when it is available. Our plans are to fully comply with this requirement.

Sincerely,

Chuck Liehe

P.T.O. driven centrifugal pumps

Trailer mounted

Both the Tracto-Rain and Tracto-Flood models are complete trailer mounted pumping units. They may quickly be coupled to any conventional 540 RPM tractor power take-off with a 1 $\frac{1}{8}$ -inch, six-tooth spline, or 1000 RPM take-off with a 1 $\frac{1}{2}$ -inch, 21-tooth spline.

These P.T.O. units are available with a selection of sheave diameters that provide a range of Vee-belt step-up drive ratios. Pump speed may be varied to meet exact pumping conditions.

The Type "B" centrifugal pumps used with these units are the same rugged pumps that have gained a reputation for dependability in thousands of pumping installations.

Capacities to 3,250 gallons per minute; Pressures to 195 PSI.

Handy primer and priming
check valve sold separately.

(purchased also)

Tracto-Rain... for sprinkler irrigation
Tracto-Flood... for flood irrigation

MAINTENANCE

AUG 08 1994

Maximum overall width: 40"

* Pump speeds are limited to maximum RPM listed on performance charts.

NOTE: "Transmission components on trailers are limited to the following approximate horsepowers: T1 to 35 BHP, T2 to 55 BHP, T2A to 80 BHP."

"Failure to stay within these limitations will void the warranty."
