RE: License No. 45-7517 - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

Shelley W. Keen

Water Rights Supervisor

BURLEY ID 83318**

Kari Lynn Townsend
Secretary

MICROFILMED
SEP 07 2001

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: Water Right No. 45-07517

Gentlemen:

The Department is reviewing the above referenced permit prior to issuing a water right license. We find that this right has been partially decreed in the Snake River Basin Adjudication (SRBA), however, pursuant to Section 42-1421, Idaho Code, we must complete the statutory licensing procedure in accordance with Section 42-219, Idaho Code. We have included copies of the above referenced sections of Idaho Code for your convenience. Once the license has been issued the Department will reflect the completion of the licensing process in its water rights database. By issuing a license on this permit, the Department confirms that a water right has been established in compliance with the terms of the permit. The examiner who verified your water use reported that the place of use and the point of diversion are in a location other than what was described on your permit. Therefore, before a license can be issued, your permit must be amended to depict this water right as it was actually developed.

The enclosed Application for Amendment form depicts the place of use and other information, as it will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented please sign the form and return it with the \$50.00 filing fee within 60 days.

Also, please note that some of the proposed conditions of approval and remarks may be modified upon further administrative review.

If you do not concur with the field examiner's findings, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208)327-7944.

Sincerely,

KAY WALKER
Sr. Water Resource Agent

RE: Water Right Permit Nos. 45-07517 and 47-08077

Dear Mr. Davis:

Our field examiner, Amanda Folsom, met with you, in your office, on June 30, 2000, to complete beneficial use field examinations of the above referenced permits. Prior to preparing licenses on these permits we find that we need additional information.

These water rights have been partially decreed in the Snake River Basin Adjudication (SRBA) at locations different than the locations that were permitted. Even though these rights have been partially decreed we are still required to complete the licensing procedure pursuant to Sections 42-1421 and 42-219, Idaho Code.

We want to ensure that the licenses we will be issuing are correct. We noticed on other exams completed by Amanda that you had compiled GPS locations of the systems after the partial decrees had been issued. We are wondering if you have GPS information in your records to substantiate the locations recommended for licensing under Permit Nos. 45-07517 (Silver Quarry Spring) and 47-08077 (Shoshone Meadows Riparian Reservoirs). If you have completed GPS work on these systems, could you please send us a copy for our files? The permits will have to be amended to identify the locations actually developed and we would like to be certain of the locations identified.

I have been asked to expedite the licensing of these permits and need the information as soon as possible. If I don't hear from you by August 23rd I will assume that you do not have GPS locations for these systems and request an on-site field exam be conducted. Please feel free to contact me about this if you have any questions. My telephone number is (208)327-7944.

Sincerely,

Kay Walker

RE: Changes to Field Examination

Date: June 20, 2000

.....

In review of this exam, I found the examiner had recommended a volume amount for this right rather than a live flow amount. This right uses spring water which is piped into a trough. Since the spring is diverted into a pipeline, I recommend using a live flow component on this license with volume limits for the number of animals drinking the water.

I also found that the priority date of this right had been data entered wrong since the right was first put into our computer system. The priority had been entered as 1/14/1983 but should have been shown as 1/4/1983. I have prepared the license recommendations with the correct priority date.

DATE: June 14, 2000

I performed this exam along with four others at the BLM office in Burley on June 9, 2000. Mr. Steve Davis along with his assistant met with me and gathered the information from files and documents there at the office.

The BLM excavated an existing spring in the SENWSW $\frac{1}{4}$ of Sec 14, Twn 15S, Rng 22E, and placed a 500-gallon trough next to the spring. The water is collected and then passes through a set of pipes to the trough. At this moment in time, the trough has come up missing. Apparently someone thought it had been abandoned or the cows ate it. The BLM is in the process of replacing the trough, which will be exactly the same as the first.

This permit also pertained to cabins that were going to use the spring water in Sec 15. However, Steve informed me that the development for the cabins to use the spring water never took place. There is no domestic use for this permit. Steve also confirmed that 1250 sheep, 125 range cattle, and various wildlife use the water. My recommendation is based on the information provided by Steve Davis and the project reports on file at the BLM. My recommendation is as follows:

Stockwater	0.01afa
Wildlife	0.01afa
Total	0.01afa

F. FLOW CALCULATIONS

Measured Method:

Additional Computation Sheets Attached

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$$

$$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 =$$

$$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} =$$

2. Volume Calculations for Other Uses:

500 gal trough
