RE: Water Permit 37-7351

Dear Sir;

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

Field examinations must be done while the system is in operation. For this reason we concentrate on irrigation permits during the summer months and do examinations on permits for other uses during the non-irrigating months.

If you have any questions regarding the field examination, please contact our office.

Sincerely,

Gary L. Funderburg

RE: Permit No. 37-7351

Dear Gentlemen:

We are in receipt of proof of application of water to beneficial use for Permit No. 37-7351. We have found that the proof is correct with one exception. Under Item 7b you mention the measurement of the water system should be made by the Department of Water Resources.

It is true that the Department will measure a water system, however, an access port must be provided for this measurement. Originally, your permit was approved with the stipulation that a measuring device be installed. That requirement was changed by an order sent to you in November 1978 which modified the condition to the requirement that an access port be installed. We are enclosing specifications for an access port, which will delay action on your proof until August 21, 1979. Please notify the office by that date of provisions you have made for an access port or measuring device so that we can prevent any further lapsing procedures.

If you have any further questions about the matter, please contact this office.

Sincerely,

Jim Johnson

Gentlemen:

One of the conditions of approval of your water Permit No. 37-7351 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before May 1, 1979. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise, the permit will lapse and be of no further force or effect.

Dear Wateruser:

The enclosed Order changes the measuring device condition of approval on your water right permit.

The changed condition should be less restrictive and provide more flexibility to you in the development of your water right system. The specifications related to the size and location of the access port will be available upon request from the Department, as soon as the Department's measuring equipment is obtained.

If you have questions regarding this matter, please contact this office or our regional offices.
