Subj: Assignment Fee Interpretation

From Jim Johnson via Cindy Zimmerman, the following interpretation of assignment of permit/application for permit fees should be utilized for future events:

If the application for permit has NOT been advertised, an assignment may be processed without a fee.

If the application for permit has been advertised, the assignment processing will require a fee.

Multiple water right numbers may be shown on a single assignment form, but a fee must be paid for each number.

Carry on!!!

**Distribution: Applicants Whose Water Right Applications Were Held
Without Action Under the Boise River Basin
Moratorium**

Dear Applicant:

As you might be aware, on May 3, 1995 the Director of the Department of Water Resources, Mr. R. Keith Higginson, signed an Amended Moratorium Order which provides for the processing of previously held applications within the Boise River Basin, with certain restrictions. Enclosed for your information is a copy of the Order.

As provided in the Order, this office will resume the processing of these applications in order of priority at a rate of 30 applications per month. Depending on how many applicants wish to proceed with development of their projects, the processing of the 338 presently-held applications could require as much as a year. To enable you to make an estimate as to when your application(s) will be processed, please be advised that 244 of the applications have priority (receipt) dates of 1992; 32 are dated 1993; 37 are dated 1994; and 25 are dated 1995.

As new applications are received, they are sorted into two groups. Those that would not have been held back under the moratorium are processed immediately. To assure fairness in processing, those that would have been held back under the moratorium, such as irrigation applications, are placed at the end of the moratorium processing line.

Note that the Order requires that all applications held under the moratorium will be advertised (or re-advertised if previously advertised), in order to enable neighboring water users to examine the proposed uses in view of water availability information gained during recent drought years. There will be no additional charge to the applicants for this process. For applications that propose use of ground water, the advertisement must include an indication of the depth interval from which the applicant proposes to withdraw water.

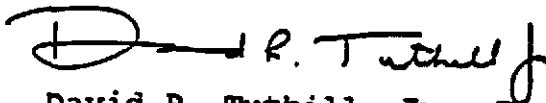

Please find enclosed a Profile Report which provides information from our water rights data base describing each of your moratorium-held applications. In addition we have included one response form for each application, which enables you to indicate whether you wish to proceed with processing of your water right application(s).

May 19, 1995

In case you no longer intend to develop a water use as described on an application, please complete and return the enclosed Withdrawal Form. Because of the time and effort already devoted to researching water availability in the Boise River basin, the Department will not be able to provide refunds of fees for applications that are withdrawn.

If you have questions about this process, or if you need assistance in completing the response form, please feel free to contact this office at (208) 334-2190. Response forms received no later than May 31, 1995, will be used in compiling the applications that will be advertised during June.

Sincerely,

David R. Tuthill, Jr., P. E.

RE: License 63-03597C and Application for Permit No. 63-12007

Dear Applicants:

Enclosed is information related to the above-referenced water right license and application for a new right. The forms will allow you to retain a portion of an existing right and decide what to do about the application. Please review the following information in completing the forms.

License 63-03597C

You indicated that you are the new owners of 160 acres in Section 10. License 63-03597C covers 152 of these acres. The license is involved with adjudication claim no. A63-03597C (Montierth et al) which was filed to protect the right in the ongoing Snake River Basin Adjudication. As new owners you should file the change in ownership form to reflect the portion of the right, which is assumed to be appurtenant to the property unless specified otherwise in a legal document, now owned by you. Complete the form and return it with the three attachments and proof of ownership of the property in question. The department will then split the license and adjudication claim, assigning a proper share to you.

You also expressed an interest in avoiding forfeiture (non-use for five or more consecutive years) of your portion of 63-03597C. This can be done by completing and returning the extension of time form. Proof of ownership information from the change in ownership form will also be used in the extension process. Be sure to complete items 9 and 10 and include a notarized signature on the extension form.

Application 63-12007

An application was filed for two wells for full water on 160 acres. If you do not intend to irrigate the acres within the next few years and if the extension of time for 63-03597C is approved, application 63-12007 should be withdrawn. This can be done by using the withdrawal form, but be sure not to submit this until an extension on your part of the existing right is confirmed. A \$105 refund will occur if 63-12007 is withdrawn.

M. and E. Johnson III

April 30, 1993

Page 2

However, if your intention is to not irrigate in 1993 but to resume irrigation shortly thereafter, you may want to keep application 63-12007 before the department. In this case an extension would be sought for part of 63-03597C to avoid forfeiture for non-use for a specified period but where use would resume after that period, and application 63-12007 would be desired for use when 63-03597C resumed operation or shortly thereafter.

If you decide to keep application 63-12007 before the department, please be aware that such filings cannot be approved at this time due to a moratorium on new rights. The moratorium is related to drought conditions but does not affect the priority date ("seniority date") of applications. The application could be kept on hold until the moratorium is modified or lifted for this area, at which time you could decide whether or not to proceed with 63-12007.

Summary

The first and most important step is to complete the change in ownership and extension of time forms for your share of 63-03597C. This will protect the right until a specified date. Your decision about application 63-12007 can wait until the extension issue is settled.

Return the completed forms to me as soon as possible. Keep the withdrawal form for future use if needed. Application 63-12007 will remain on hold at this office pending future decisions. No additional fees are needed. Please let me know if you need more information.

Sincerely,

Steve Lester
Water Rights Supervisor
