Permit To Appropriate Water

NO. 63-11911

Proposed Priority: August 10, 1992 Maximum Diversion Rate: 1.30 CFS

This is to certify, that **HAROLD LESTER**
12753 MIDWAY RD
NAMPA ID 83686

has applied for a permit to appropriate water from: **GROUNDWATER**
and a permit is **APPROVED** for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
IRRIGATION	03/15 to 11/15	1.30 CFS

LOCATION OF POINT(S) OF DIVERSION: NENE , Sec. 36, Township 03N, Range 03W
CANYON County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
03N	03W	25	SWSE 40	SESE 25		65

Total number of acres irrigated: 65

CONDITIONS/REMARKS:

1. This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.
2. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
3. This right to divert groundwater is void if the surface water right appurtenant to the place of use is sold, transferred, leased or used on any other place of use without the approval of the Department.
4. The permit holder shall use the full allotment of his surface water right, to the extent it is available, in conjunction with groundwater diverted pursuant to this permit.
5. The permit holder must employ reasonably efficient methods of water application to conserve the water of the State of Idaho.
6. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
7. Construction of the well must comply with Idaho well construction standards.
8. This right is subject to all prior rights.

State of Idaho
Department of Water Resources

Permit To Appropriate Water

NO. 63-11911

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code.
Witness the signature of the Director, affixed at Boise, this

5th day of October, 1992

R. Keith Higginson
for R. Keith Higginson, Director

Ident. No. 63-11911

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name: HAROLD LESTER
Address: 12753 MIDWAY RD
NAMPA ID 83686

208-466-1023

2. Source: GROUNDWATER Trib. to:
3. Location of Point of Diversion: NENE Sec. 36, Township 03N, Range 03W
CANYON County

4. Water will be used for the following purposes:

Purpose	From	To	CFS	(or)	AF
IRRIGATION	03/15	11/15	1.300		

5. Total quantity to be appropriated is:
1.300 CFS (and/or) AF

6. Proposed diverting works:

- Description of ditches, flumes, pumps, headgates, etc.
WELL, PUMP
- Height of storage dam feet; active reservoir capacity
acre-feet; total reservoir capacity acre-feet; period of
year when water will be diverted to storage: to inclusive.
- Proposed well diameter is 16 inches; proposed depth of well is 300
feet.
- Is groundwater with a temperature greater than 90F being sought? NO

7. Time required for the completion of the works and application of
the water to the proposed beneficial use is 1 years.

8. Description of proposed uses:

9. Place of Use: IRRIGATION

TWN	RGE	SEC	ACRES	ACRES	ACRES	TOTAL
03N	03W	25	SWSE 40	SESE 25		65

Total number of acres irrigated: 65

10. Describe any other water rights used for the same purposes.
BOISE/KUNA CANAL SHARES

11. a. Who owns the property at the point of diversion?
APPLICANT
b. Who owns the land to be irrigated or place of use?
APPLICANT
c. If the property is owned by a person other than the applicant,
describe the arrangement enabling the applicant to make this filing.

12. Remarks:
Supplemental use only.

13. Map of proposed point of diversion and place of use attached? ☒

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

Water Right Number: 63-11911

Comment Date: 8/ 7/1992 User ID: GRAVES

Subject: 63-02832

63-02796 uses the same p/d for 40 acres in the NENE, sec 36. At the time of the exam .84 cfs was measured. Mr. Lester filed 63-02832 on the additional .04 cfs to be used on 40 acres in the SWSE, sec 25. In 1990, Mr. Lester adjudicated 63-02796 but not 63-02832. Remarks on A63-02832 state "This claim is no longer used". On 8/7/92, Mr. Lester filed a transfer to add a p/d. He plans to use the old irrigation well for domestic purposes only and drill a new irrigation well for supplemental use on 63-02796 and 63-11911.

DIRECTOR

May 19, 1995

**Distribution: Applicants Whose Water Right Applications Were Held
Without Action Under the Boise River Basin
Moratorium**

Dear Applicant:

As you might be aware, on May 3, 1995 the Director of the Department of Water Resources, Mr. R. Keith Higginson, signed an Amended Moratorium Order which provides for the processing of previously held applications within the Boise River Basin, with certain restrictions. Enclosed for your information is a copy of the Order.

As provided in the Order, this office will resume the processing of these applications in order of priority at a rate of 30 applications per month. Depending on how many applicants wish to proceed with development of their projects, the processing of the 338 presently-held applications could require as much as a year. To enable you to make an estimate as to when your application(s) will be processed, please be advised that 244 of the applications have priority (receipt) dates of 1992; 32 are dated 1993; 37 are dated 1994; and 25 are dated 1995.

As new applications are received, they are sorted into two groups. Those that would not have been held back under the moratorium are processed immediately. To assure fairness in processing, those that would have been held back under the moratorium, such as irrigation applications, are placed at the end of the moratorium processing line.

Note that the Order requires that all applications held under the moratorium will be advertised (or re-advertised if previously advertised), in order to enable neighboring water users to examine the proposed uses in view of water availability information gained during recent drought years. There will be no additional charge to the applicants for this process. For applications that propose use of ground water, the advertisement must include an indication of the depth interval from which the applicant proposes to withdraw water.

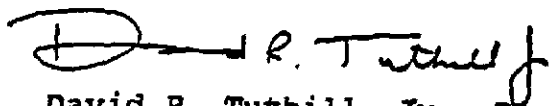

Please find enclosed a Profile Report which provides information from our water rights data base describing each of your moratorium-held applications. In addition we have included one response form for each application, which enables you to indicate whether you wish to proceed with processing of your water right application(s).

May 19, 1995

In case you no longer intend to develop a water use as described on an application, please complete and return the enclosed Withdrawal Form. Because of the time and effort already devoted to researching water availability in the Boise River basin, the Department will not be able to provide refunds of fees for applications that are withdrawn.

If you have questions about this process, or if you need assistance in completing the response form, please feel free to contact this office at (208) 334-2190. Response forms received no later than May 31, 1995, will be used in compiling the applications that will be advertised during June.

Sincerely,

David R. Tuthill, Jr., P. E.
Manager, Western Region Office

RE: Water Right No. M63-11911

Dear Water Right Holder(s):

In 1992, the Department issued you a temporary permit to use groundwater from your well, if you drilled one, to replace depleted storage water supplies. This temporary permit expired on November 15, 1992.

During 1994, since available surface water supplies are again substantially below normal, the department has received a number of requests to re-authorize use of the "1992 drought relief" wells.

The department is willing to consider reinstating the temporary permits for the remainder of 1994 provided you can show that you used water under the 1992 temporary approval and that water will be used only on the lands identified on the temporary permit. Enclosed is a questionnaire which you must complete and return to the department if you want to be considered for reinstatement in 1994.

Also enclosed, for your reference, is a record of your application for permit.

Please be advised that unless the department specifically reinstates the expired permit, you are not authorized to divert and use the water from the well identified on the temporary permit.

If you have any questions, please feel free to contact me at Ph. 327-7947.

Sincerely,

A handwritten signature in dark ink, appearing to be 'Jim Johnson', written over a horizontal line.

RE: Water Right No. M63-11911

Dear Water Right Holder(s):

In 1992, the Department of Water Resources issued the above referenced permit allowing the diversion of water for the 1992 irrigation season only. The permit included a condition:

This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.

It now appears that 1994 early season water supply and precipitation conditions are such that short-term use of the wells that were drilled under this authority could be beneficial prior to the start of water delivery through the canal systems in the Boise Valley. We have been advised that most of the canals will not be able to deliver water for another 10 to 14 days.

Therefore, you are hereby notified that the permit is reinstated for temporary use during the period April 1 through April 15, 1994 only. All other conditions of the permit continue to apply. One requirement was that the well be disconnected from the power system at the end of the approved period of use, which under this reinstatement is April 15, 1994.

The existing moratorium in the Boise Valley area is not changed by this temporary reinstatement of the 1992 drought well permit. This temporary reinstatement does not authorize the construction of a new well or alteration of an existing well.

If you have any questions, please contact this office.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

RE: PERMIT NO. 63-11911

LETTER OF TEMPORARY PERMIT APPROVAL

Dear Permit Holder(s):

Enclosed is a copy of your approved permit. Your proposed use of water qualifies for a narrow exception to the Snake River Basin Moratorium established by the Director on May 15, 1992. The exception allows the use of groundwater during the drought to protect agricultural uses which normally have an adequate supply of water. Please carefully review the conditions of approval.

The Department has approved your permit for the 1992 irrigation season. Diversion of groundwater is not authorized after the 1992 season, and the permit expires. The Director may reinstate the permit in a subsequent year if drought conditions persist. You will be responsible for requesting reinstatement during future irrigation seasons.

When your permit expires, you must make the pump and motor inoperable, and cannot operate the pump without approval from the Department of Water Resources.

Your permit is for supplemental use only to augment your surface water supply. If the surface water you own is sold, transferred, leased or used on any other land without the approval of the Department of Water Resources, you automatically lose your right to divert groundwater. You must obtain the approval of the Department before using your water anywhere other than where it has traditionally been used.

In addition, you must fully utilize your available surface water to the extent possible. The surface water need not be fully consumed or diverted prior to use of groundwater. You cannot, however, simply divert token quantities of surface water and rely primarily on your groundwater diversion. Surface water must be your primary source of water.

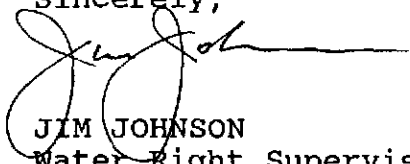

If you want to locate your well closer than 500 feet from an existing well, you must obtain the approval of the Department of Water Resources. We realize that under certain circumstances, it may be impossible to locate the well 500 feet away from another well. You must, however, be cognizant of possible interference resulting from pumping of your well.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If general water levels in the geographical area of your well decline below reasonable levels, the Department may require you to cease diverting from your well.

You must efficiently apply the water to the land and conserve water to the extent possible. Excessive irrigation, delivery systems with substantial losses, and application methods which cause substantial percolation or evaporation are not acceptable.

Sincerely,

JIM JOHNSON
Water Right Supervisor

JJ:cz

APPLICANT NAME

63-11911

APPLICATION NO.
(if known)

MORATORIUM EXEMPTION QUESTIONNAIRE

IF YOUR APPLICATION PROPOSES AN IRRIGATION USE, PLEASE COMPLETE AND RETURN THE FOLLOWING:

- Has ALL the land you propose to irrigate been irrigated with surface water in the past?
Yes
- Do you seek supplemental well water for the 1992 irrigation season?
Yes
- Do you summer fallow any of your irrigated land? If so, how many acres?
No
- List the water right(s) you have used to irrigate the land listed on the application. If you have received water from a canal company or water district, please identify the name of the canal or water district.
Boise / Kuna
- During the last ten years, how many years has your surface irrigation water been available for the entire irrigation season?
all
- What crops have you grown in the past ten years?
Beans, corn, alfalfa seed, grain, beets

I understand if my proposed diversion of groundwater is approved as a supplemental use, that I can only use my well during periods of drought, when a full supply of water is not available. I also agree that my surface water will be fully used to the extent available, will not be sold or used on other lands, and that a change in use of my surface water may result in revocation of any groundwater right granted pursuant to my application for supplemental water.

X Dated this 10th day of August, 1992.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is

APPROVED

Date

8-6-92

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

SPECIFIC CONDITIONS:

10. Well may not be constructed within 500' of the nearest domestic well without approval of the Department.
11. Surface Seal shall extend from land surface to a depth of 100 ft or the next significant confining layer whichever is greater.
